Dear Lyndon

SUBMISSION OF PROPOSED REVISIONS TO THE ACCESS ARRANGEMENT

I am pleased to provide to you Western Power's Proposed Revisions to the Access Arrangement and Access Arrangement Information for the regulatory period commencing 1 July 2012, as required by the Electricity Networks Access Code 2004 ("Code") and Western Power's current Access Arrangement.

The following documents comprise our submission:

1. a printed copy of the submission and supporting documents; and
2. an electronic version, via the Western Power portal, of the submission and supporting documents for your publication. The portal access details have already been provided to your staff (Tyson Self, Elizabeth Walters and Amy Rees).

Please note that both the hard-copy and electronic versions include an Access Arrangement Supplementary section, which contains information that is commercial in confidence and not for external publication.

We have engaged extensively with our key customers, retailers and generators in the development of these revisions. We have regularly engaged with Government to discuss outcomes and funding requirements to achieve support for our program and investment requirement.

We look forward to working with the Authority and its consultants over the coming months to ensure an efficient and effective process so that we can achieve an outcome as soon as practical.

If you wish to discuss this submission further I invite you to contact myself or alternatively Phil Southwell, General Manager, Regulation and Sustainability on 9326 4724.

Yours sincerely

DOUG ABERLE
MANAGING DIRECTOR
