Neil Raffan Risk & Sustainability Manager – Australia Infigen Energy Level 22, 56 Pitt Street, Sydney NSW 2000

Dear Mr Raffan

# **Performance Audit Electricity Licence**

The fieldwork on the performance audit of Generation Licence EGL 2 for the audit period (1 February 2010 to 31 January 2013) is complete and I am pleased to submit the report to you. The report reflects my findings and opinions.

In my opinion, the Licensee has maintained a good level of compliance with the licence conditions and integrity with the Licensee's reporting obligations. There is a non-complying item noted.

In my opinion, the Licensee maintained, in all material aspects, effective control procedures in relation to the Generation Licence EGL 2 for the audit period on the relevant clauses referred to within the scope section of this report.

Yours sincerely

Kevan McGill Director

Date 30 April 2013

# 1 Executive Summary

Walkaway Wind Power Pty Ltd (Walkaway) holds Generation Licence EGL 2 issued by the Economic Regulation Authority (*Authority*) under the Electricity Industry Act 2004. This performance audit was conducted in accordance with the guidelines issued by the *Authority* for the audit period (1 February 2010 to 31 January 2013) to assess the Licensee's level of compliance with the licence conditions.

Walkaway operates a wind powered generation system in Walkaway (near Geraldton).

The records and areas covered by the Licence were inspected and interviews were also held with key personnel at the operational site (Walkaway).

The Electricity Licence requires the Licensee to provide the *Authority* with an audit report from an independent expert on a defined time scale.

#### 1.1 OVERALL CONCLUSION

In my opinion, the Licensee has maintained a good level of compliance with the licence conditions and integrity with the Licensee's reporting obligations. There is a non-compliance noted.

In my opinion, the Licensee maintained, in all material aspects, effective control procedures in relation to the Generation Licence EGL 2 for the audit period based on the relevant clauses referred to within the objectives section (Page 8) of this report.

A summary of the findings of the performance audit is given in section 1.2 below.

#### 1.2 RATINGS

A risk assessment approach is used to develop the depth of audit required for each obligation and is documented in an Audit Plan approved by the *Authority* prior to audit. A 5 level Audit Priority scale is used based on the combined rating for Inherent Risk and Control Adequacy defined in the following table. Following approval of the audit plan, a number of obligations were approved by the *Authority* for removal from the audit. All of the Licensee's obligations assessed in this audit, have an Audit Priority rating of 4 or 5.

Inherent		Weak	Moderate	Strong
risk	High	Audit Priority 1	Audit P	riority 2
	Medium	Audit Priority 3	Audit P	riority 4
	Low		Audit Priority 5	

The audit has determined a compliance rating for each Obligation using the 7-point rating scale (5 for numerical rating score and 2 not rated/not applicable scales) described in the table below.

Compliance status Rating		Description of compliance	
COMPLIANT 5		Compliant with no further action required to maintain compliance	
COMPLIANT	4	Compliant apart from minor or immaterial recommendations to improve the strength internal controls to maintain compliance	
COMPLIANT	3	Compliant with major or material recommendations to improve the strength of internal controls to maintain compliance	
NON-COMPLIANT	2	Does not meet minimum requirements	
SIGNIFICANTLY NON-COMPLIANT	1	Significant weaknesses and/or serious action required	
NOT APPLICABLE	N/A	Determined that the compliance obligation does not apply to the Licensee's business operations	
NOT RATED	N/R	No relevant activity took place during the audit period, therefore it is not possible to assess compliance	

The total number of licence obligations assessed are summarised by audit priority ratings below.

	Audit Priority					
Assessment	Total	1	2	3	4	5
Compliant 5	16	0	0	0	11	5
Compliant 4	0	0	0	0	0	0
Compliant 3	0	0	0	0	0	0
Non-compliant 2	1	0	0	0	1	0
Significantly Non-compliant 1	0	0	0	0	0	0
Not Applicable	0	0	0	0	0	0
Not Rated	27	0	0	0	17	10

\* Note Where an obligation was not exercised in the audit period, it was not possible to form an opinion about compliance and the item was not rated.

## 1.2.1 COMPLIANCE ASSESSMENT OF ITEMS FROM PREVIOUS AUDIT

Ref	Description	Corrective Action	Previous Post Audit Implementation Plan	Action Taken

#### 1.2.2 COMPLIANCE ELEMENTS REQUIRING CORRECTIVE MEASURES

The actions requiring corrective measures are:

Item	Issue	Recommended Action
124	Not all reports were on time.	The Licensee improves management of regulatory compliance issues.

1.2.3	SUGGESTIONS FOR IMPROVEMENT
-------	-----------------------------

There are no suggestions for improvement.

# 2 PERFORMANCE AUDIT

#### 2.1 PERFORMANCE AUDIT OBJECTIVES

Under section 13 of the *Electricity Industry Act 2004* (the Act), it is a requirement that every Licensee provide the Economic Regulation *Authority* (*Authority*) not less than once in every period of 2 years (or any longer period that the *Authority* allows) with a performance audit conducted by an independent expert acceptable to the *Authority*. The Act states a performance audit is an audit of the effectiveness of measures taken by the Licensee to meet the performance criteria specified in the licence. The licence states that performance standards are contained in applicable legislation. Performance criteria are defined in the licence as:

- (a) the terms and conditions of the *licence*; and
- (b) any other relevant matter in connection with the applicable legislation that the *Authority* determines should form part of the audit.

The licence also provides for individual licence conditions namely - the *Authority* may prescribe individual performance standards in relation to the Licensee of its obligations under this licence or the applicable legislation (the Act and subordinate legislation).

The *Authority* has summarised the performance requirements in various legislation in its Electricity compliance reporting manual (May 2011)<sup>1</sup>.

The Licensee appointed McGill Engineering Services Pty Ltd to conduct the audit of its Generation Licence with approval from the *Authority*. A preliminary assessment was conducted with the Licensee's management to determine the inherent risk and the state of control for each compliance element of the Licence obligation. McGill Engineering Services Pty Ltd then prioritised the audit coverage based on the risk profile of the Licensee with an emphasis on providing greater focus and depth of testing for areas of higher risk to provide reasonable assurance that the Licensee had complied with the standards, outputs and outcomes under the Licence obligations.

The audit was conducted in a manner consistent with Australian Auditing Standards (AUS) 808 "Planning Performance Audits" and AUS 806 "Performance Auditing". McGill Engineering Services Pty Ltd evaluated the adequacy and effectiveness of the controls and performance by the Licensee relative to the standards referred in the Generation Licence through a combination of enquiries, examination of documents and detailed testing for Generation Licence EGL 2 for the Licensee.

#### 2.2 AUDIT PERIOD

The audit period is 1 February 2010 to 31 January 2013. This is not the first audit. The previous audit period was 1<sup>st</sup> February 2008 to 31 January 2010.

<sup>&</sup>lt;sup>1</sup> Electricity compliance reporting manual, May 2011. Note that the 2013 compliance reporting manual was issued outside the audit period and no reporting has occurred to that manual.

#### 2.3 STATEMENT OF INDEPENDENCE

To the best of my knowledge and belief, there is no basis for contraventions of any professional code of conduct in respect of the audit.

I have not done or contemplate undertaking any other work with the Licensee.

There are no independence threats due to:

- self-interest as the audit company or a member of the audit team have no financial or non-financial interests in the Licensee or a related entity;
- self-review no circumstance has occurred:
  - where the audit company or a member of the audit team has undertaken other non-audit work for the Licensee that is being evaluated in relation to the audit/review; or
  - when a member of the audit team was previously an officer or director of the Licensee; or
  - where a member of the audit team was previously an employee of the Licensee who was in a position to exert direct influence over material that will be subject to audit during an audit/review.

There is no risk of a self-review threat as:

- no work has been undertaken by the auditor, or a member of the audit/review team, for the Licensee within the previous 24 months; or
- the auditor is currently undertaking for the Licensee; or
- the auditor has submitted an offer, or intends to submit an offer, to undertake for the Licensee within the next 6 months; and
- there is no close family relationship with a Licensee, its directors, officers or employees, and
- the auditor is not, nor is perceived to be too sympathetic to the Licensee's interests.

#### 2.4 SCOPE LIMITATION

The audit was undertaken by examination of documents, interviews with key persons and observations and is not a detailed inspection of physical items.

#### 2.5 INHERENT LIMITATIONS

Because of the inherent limitations of any internal control structure, it is possible that fraud, error or non-compliance with laws and regulations may occur and not be detected.

An audit is not designed to detect all weaknesses in compliance measures as an audit is not performed continuously throughout the period and the audit procedures performed on the compliance measures are undertaken on a test basis. Any projection of the evaluation of the operating licence to future periods is subject to the risk that the compliance measures in the plans may become inadequate because of changes in conditions or circumstances, or that the degree of compliance with them may deteriorate.

The audit opinion expressed in this report has been formed on the above basis.

#### 2.6 SCOPE OF THE AUDIT

The audit was conducted in 3 phases.

1. Risk and Materiality Assessment

With reference to AS/NZS4360 Risk Management a preliminary assessment was made of the risk and materiality of non-compliance with the required licence conditions in order to focus the audit effort on areas of higher compliance risk and identify areas for testing and analysis.

2. System Analysis, Assertion Setting and Review

Through discussion, observation and review, a sample of cases or data was analysed relating to the Licensee's quality and performance systems and standards against requirements of the Licence conditions to be audited.

#### 2.6.1 FIELDWORK: TESTING AND ANALYSIS

Using the results of the risk assessment and systems analysis, detailed testing and analysis was performed to compare those standards maintained by the Licensee with the relevant clauses of the Licence.

During this audit the licensed area was visited.

Ref	Description	Corrective Action	Previous Post Audit	Action Taken
	_		Implementation Plan	
86 Now 106	A licensee must take reasonable steps to minimise the extent or duration of any interruption, suspension or restriction of the supply of electricity due to an accident, emergency, potential danger or other unavoidable cause.	Update document references on the contents of the SMP for the ERP. Create a master list that identifies the latest revision of the Appendices	Identify the current issue status on each of the addenda 1 to 8 attached to the Service Management Plan (SMP) Establish a document control register in the Service Management Plan (SMP) that identifies the attached addenda 1 to 8 and the details of their current issue status.	Current issue status added to SMP. Control register added to SMP.

#### 2.6.2 CORRECTIVE ACTIONS FROM LAST AUDIT

#### 2.7 AUDIT ROLES

The report to the Licensee and the *Authority* clearly expresses the opinion of the auditor in respect of the findings of the audit.

The key contacts were:

- Licensee
  - o Carsten Johansen, Site & Technical Manager Alinta Wind Farm
  - Gary Mackay, Vestas Fleet Manager
  - o Neil Raffan, Risk & Sustainability Manager Australia
- Vestas Australian Wind Technology Pty Ltd (key service provider):
  - o Anthony Russell, Site Supervisor
  - o Matt Dickie, Area Service Manager
- McGill Engineering Services Pty Ltd
  - Kevan McGill, John McLoughlin

The audit was conducted during February to March 2013. Kevan McGill and John McLoughlin took about 80 (65/15) hours on the audit.

#### 2.8 AUDIT REQUIREMENTS

Compliance with licence conditions was examined according to the likely inherent risk and the adequacy of controls to manage that risk.

#### Nature of audit work conducted

The Authority guidelines for performance audits require that the audit considers:

- a) **Process compliance** the effectiveness of systems and procedures in place throughout the audit period, including the adequacy of internal controls.
- b) **Outcome compliance** the actual performance against standards prescribed in the licence throughout the audit period.
- c) **Output compliance** the existence of the output from systems and procedures throughout the audit period (that is, proper records exist to provide assurance that procedures are being consistently followed and controls are being maintained).
- d) **Integrity of performance reporting** the completeness and accuracy of the performance reporting to the *Authority*.
- e) **Compliance with any individual licence conditions -** the requirements imposed on the specific Licensee by the *Authority* or specific issues for follow-up that are advised by the *Authority*.

#### 2.9 LICENCE

In December 2008 Babcock and Brown Wind Partners (BBWP) internalised its management, previously performed by Babcock and Brown. As a stand - alone company BBWP was renamed as Infigen Energy Ltd. Walkaway Wind Power Pty Ltd is an entity wholly owned by Infigen Energy Ltd.

The current licence V5 was issued in January 2011 and the previous in January 2009.

#### 2.10 OVERALL CONCLUSION

In my opinion, the Licensee has maintained a good level of compliance with the licence conditions. There is a non-complying item.

In my opinion, the Licensee maintained, in all material aspects, effective control procedures in relation to the for Generation Licence EGL 2 for the audit period based on the relevant clauses referred to within the scope section of this report.

#### 2.11 FINDINGS

The conclusions of each of the elements of the licence are summarised in the following table. The audit risk as determined for each licence condition is also shown. The details of the audit can be seen in detailed findings Page 17.

#### The following are the risks determined for audit elements.

Item	Licence Clause/Condition reference (Cl.=clause, Sch.=schedule) G/D/T/R	Obligations under condition	Consequences (1=Minor. 2=Moderate. 3=Maior)	3	Inherent Risk	Adequacy of Existing Controls (S=Strong, M=Moderate, W=Weak)	G = Generation	Type	Review priority	Rati	ng

#### 2.12 ESTABLISHING THE CONTEXT

The key legislation that governs the licensing of providers of electricity is the Electricity Industry Act 2004. In turn, the compliance elements in the Licence were examined and referred to throughout the audit process.

2.12.1 AUDIT RESULTS AND RECOMMENDATIONS

#### Summary of significant results

There is a non-compliance.

#### 2.12.2 COMPLIANCE ELEMENTS REQUIRING CORRECTIVE MEASURES

The actions requiring corrective measures are:

Item	Issue	Recommended Action
124	Not all reports were on time.	The Licensee improves management of regulatory compliance issues.

#### 2.12.3 SUGGESTIONS FOR IMPROVEMENT

There are no suggestions for improvement.

2.12.4 POST AUDIT IMPLEMENTATION PLAN

The Licensee will provide a separate post audit plan.

#### 2.13 DETAILED FINDINGS

#### 2.13.1 AUDIT WORK UNDERTAKEN

Interviews and enquiries were conducted to:

- Understand the control environment by determining the responsibility matrix and key control points
- Obtain the policies and procedures for managing licence and licensed areas; and
- Identify the information systems and processes employed to manage licence and licensed areas

• Determine the level of understanding of the systems and processes for managing licence and licensed areas

In reviewing the procedures and protocols for managing provision of services within a licensed area, where applicable, we obtained details of the processes and assessed the reasonableness of the decision matrix and the adequacy of the control points implemented by the Licensee.

### 2.14AUDIT EVIDENCE

The following was considered in the audit.

- Generation Licence
- Licence fee invoice /receipts
- ERA annual returns
- Infigen Australian Business Strategy April 2012 (ASSET MGT EXTRACTS)
- Asset Policy
- Alinta/Walkaway FY13 Asset Management Plan
- Walkaway 5 year financial plan
- Plant Risk Register
- RCA Reports
- Vestas Monthly Reports November & December 2012
- Infigen Monthly Performance Reports November & December 2012
- WWP statutory accounts
- Walkaway Land lease payments
- Outage information
- Risk planning information
- Directors approval of Annual reports notes
- Asset management information
- Financial data sighted
