

To whom it may concern.

I live in Quairading WA and I have noticed a huge increase in damage to the country roads between Quairading and The Lakes Service Station on Great Eastern Highway. The damage to the roads and also a big increase in fallen trees and heavy limbs of trees are due to the massive loads that these roads are being subjected to now that semi trailers with an extra trailer thunder up and down these roads causing enormous vibrations.

Please go back to using Tier 2 and 3 Rail Lines and prevent certain loss of life as the roads rapidly deteriorate causes crashes, or being crushed to death by a falling tree or slamming into a fallen tree on a bend or at night time.

Please don't allow one person to be seriously injured or killed by refusing to bring the Tier 2 and 3 Rail Lines back into service.

Thank you.

Rik Hughes
