Purpose of the Corrigenda

The purpose of this corrigenda is to correct some performance information in the 2013 Water, Sewerage and Irrigation Performance Report (Water Report) that was previously published by the Authority on 20 May 2014.

Background

Table 8 of the Report (refer to page 16) provides the average frequency of unplanned water supply interruptions for Perth as well as regional town averages and all town averages. In Table 8 of the Water Report, the Perth figures for the years from 2009 to 2013 are incorrect as is the percentage change for Perth from 2012 to 2013. All other information in Table 8 is correct.

The incorrect percentage change for Perth is also provided in the Executive Summary in the Water Report (refer to page iii) and the Summary of Key Findings document published with the Water Report.

Amendments

Table 8 on page 16 of the Water Report published on 20 May 2014, provides the following information for Perth:

Table 1: Average frequency of unplanned supply interruptions

	2009	2010	2011	2012	2013	Percentage Change 2012 - 2013
Perth	66.0	67.5	65.6	94.3	104.6	10.9%

This corrigenda corrects the Water Report by amending the Perth data in Table 8 to read:

Table 2: Average frequency of unplanned supply interruptions

	2009	2010	2011	2012	2013	Percentage Change 2012 - 2013
Perth	67.5	65.6	94.3	104.6	121.7	16.3%

The percentage change from 2012 to 2013 has also been amended from 10.9% to 16.3% in the Executive Summary of the Report (refer to page iii) and in the Summary of Key Findings document published with the Water Report.
