## Extension to publish the final findings of the Review of Western Power's Metrology Procedure for Metering Installations on the Western Power Network

The Economic Regulation Authority (**ERA**) has extended the time for the publication of its final findings of its Review of Western Power's updated Metrology Procedure for Metering Installations on the Western Power Network (**Metrology Procedure**) by 20 business days to 27 May 2015. This extension is required for the ERA to properly consider and process its final findings within the time limit specified by Clause 6.20(c) of the *Electricity Industry (Metering) Code 2012 (Code)*.

Clause 6.20(c) of the Code requires the ERA to publish its final findings within 10 business days after the closure for submissions on its draft findings on the Metrology Procedure. Clause 6.20 (3A) and (3B) of the Code also provides for the ERA to extend this time limit by publication of a notice before the day on which the time limit would otherwise have expired and provide reasons for its decision.
