Address:	PO Box 861 CLOVERDALE WA 6985
Date submitted:	10 January 2007

Submission

1. Please provide your views on the proposal, including any objections or suggested revisions

LGP supports this Rule Change proposal as it seeks to ensure that as system load increases system reliability is maintained at the level that is currently in place, by facilitating sufficient certified reserve capacity onto the system to ensure that the level of involuntary supply interruptions is kept to a minimum.

2. Please provide an assessment, whether the change will better facilitate the achievement of the Market Objectives

LGP accepts that the suggested percentage of 8.2% is appropriate on the basis of a study undertaken by CRA International, which has been published on the IMO website and reviewed by the Market Advisory Group.

3. Please indicate if the proposed change will have any implications for your organisation, (for example changes to your IT or business systems) and any costs involved

LGP would incur no organisational costs as a consequence of adopting the change.

4. Please indicate the time required for your organisation to implement the change, should it be accepted as proposed

LGP would be able to implement this Rule Change immediately.
