Date submitted:	25 February 2008

Submission

1. Please provide your views on the proposal, including any objections or suggested revisions.

System Management proposes to amend the Market Rules to change the level of information it is required to provide to the IMO in relation to ST PASA. In particular, System Management seeks to remove obligations to provide information regarding clause 3.17.9(h) which relates to potential fuel supply limitations.

System Management believes that the proposed change will remove obligations on it to provide information it cannot satisfactorily provide.

Synergy does not foresee any material adverse impacts on Synergy's operations. As such, Synergy supports the proposal at this stage.

2. Please provide an assessment whether the change will better facilitate the achievement of the Market Objectives.

At this stage, Synergy accepts System Management's view that the proposed rule change would increase the certainty of the application of the rules.

3. Please indicate if the proposed change will have any implications for your organisation (for example changes to your IT or business systems) and any costs involved in implementing these changes.

At this stage, Synergy identifies no significant cost increases in implementing this rule change proposal.

4. Please indicate the time required for your organisation to implement the change, should it be accepted as proposed.

At this stage, Synergy believes that implementation of this rule change proposal would not take a protracted period of time to implement.
