Submission

1. Please provide your views on the proposal, including any objections or suggested revisions

LGP supports the Rule Change proposal to allow the “aggregation” of Capacity Credits as a result of the IMO’s approval of facility aggregation and that the same data be provided for the individual facilities as before the aggregation.

2. Please provide an assessment, whether the change will better facilitate the achievement of the Market Objectives

LGP supports the IMO’s contention that by enhancing the efficiency of participant operations, the proposal would also support the market objective “to minimise the long-term cost of electricity supplied to customers.

3. Please indicate if the proposed change will have any implications for your organisation, (for example changes to your IT or business systems) and any costs involved

LGP would incur no organisational costs as a consequence of adopting the change.

4. Please indicate the time required for your organisation to implement the change, should it be accepted as proposed

LGP would be able to implement this Rule Change immediately.
