Date submitted:	25 July 2008

Submission

1. Please provide your views on the proposal, including any objections or suggested revisions

LGP supports the proposed Rule Change on the grounds that it would facilitate the use of LNG fuel as an environmentally-friendly and lower-cost alternative to presently defined liquid fuels; without the rule change, LNG could not be efficiently dispatched.

2. Please provide an assessment, whether the change will better facilitate the achievement of the Market Objectives

LGP supports NewGen's contention that the Rule Change would increase system security via enhanced fuel diversity, lower the cost of electricity by offering a lower cost fuel for peaking energy, and reduce greenhouse gas emissions.

3. Please indicate if the proposed change will have any implications for your organisation, (for example changes to your IT or business systems) and any costs involved

LGP would incur no organisational costs as a consequence of adopting the change.

4. Please indicate the time required for your organisation to implement the change, should it be accepted as proposed

LGP would be able to implement this Rule Change immediately.
