Address:	PO Box 861 CLOVERDALE WA 6985
Date submitted:	10 October 2008

Submission

1. Please provide your views on the proposal, including any objections or suggested revisions

LGP supports the proposed Rule Change as Intermittent Generators should receive Capacity Cost Refunds (which actually means they should make payments) in the case where a new Facility is not commissioned in accordance with the application made for Certified Reserve Capacity and Capacity Credits.

2. Please provide an assessment, whether the change will better facilitate the achievement of the Market Objectives

LGP supports the IMO's contention that the proposal supports market objective (a) (promoting the reliable production and supply of electricity and electricity related services) by providing incentives

to Market Participants developing Intermittent Facilities to develop projects in accordance with applications made to and approved by the IMO.

3. Please indicate if the proposed change will have any implications for your organisation, (for example changes to your IT or business systems) and any costs involved

LGP would incur no organisational costs as a consequence of adopting the change.

4. Please indicate the time required for your organisation to implement the change, should it be accepted as proposed

LGP would be able to implement this Rule Change immediately.
