**Submission**

---

**1. Please provide your views on the proposal, including any objections or suggested revisions**

LGP supports the Rule Change proposal on the grounds that an efficient and effective market should only require participants to provide information and System Management to use it in circumstances where the data is necessary or relevant to System Management. In this case, System Management has requested and should be granted the right to not-collect unnecessary data.

---

**2. Please provide an assessment, whether the change will better facilitate the achievement of the Market Objectives**

LGP supports System Management's contention that the proposal supports market objective (a) (to promote the economically efficient, safe and reliable production and supply of

Electricity) by reducing burdensome bureaucracy.

---

**3. Please indicate if the proposed change will have any implications for your organisation, (for example changes to your IT or business systems) and any costs involved**

LGP would incur no organisational costs as a consequence of adopting the change.

---

**4. Please indicate the time required for your organisation to implement the change, should it be accepted as proposed**

LGP would be able to implement this Rule Change immediately.

---
