

Good morning

Perth Energy has reviewed the proposed Rule Change RC\_2009\_08 (Updates to Commissioning Provisions). Perth Energy agrees with the IMO's statement that the proposed Rule Change is consistent with the objectives of the Market Rules. We consider that it will increase the efficiency of the market and will encourage economically sound actions by developers of new generators.

The period of four months allowed for undertaking of commissioning trials is considered to be appropriate for introducing new plant to the system.

We have specifically considered the publication of information provided about commissioning plans and considers that the added transparency from this outweighs any downside from publication.

Perth Energy supports the proposed Rule Change and specifically supports the publication of commissioning plans as proposed.

Kind regards

Patrick

**Patrick Peake**
