Submission

1. Please provide your views on the proposal, including any objections or suggested revisions

LGP supports Rule Change proposal on the grounds that it corrects a manifest error. Specifically, a Curtailable Load which has not been requested by System Management to drop to its Stipulated Default Load, and so is operating normally in the market, should not be required to make Capacity Cost Refunds.

2. Please provide an assessment, whether the change will better facilitate the achievement of the Market Objectives

LGP considers that the proposed changes support all the Market Objectives by correcting a manifest error and thereby maintaining the integrity of the Rules.

3. Please indicate if the proposed change will have any implications for your organisation, (for example changes to your IT or business systems) and any costs involved

LGP would incur no organisational costs as a consequence of adopting the changes.

4. Please indicate the time required for your organisation to implement the change, should it be accepted as proposed

LGP would be able to implement the changes immediately.
