Thanks Jenni,

When is expiry date for this submission?

For issue 3, we fully agree with cutting required fuel storage from 14 hrs to 12 hrs. We also would want to submit that dual fuel facilities be accorded more flexibility in nominating which fuel to store and the proportion of fuels to store (eg for PE it could be 40% gas 60% diesel...)

We should also find ways of including in these changes incentives for dual-fuel facilities as IMO has been trying to change Rules in this direction considering the supply security gain in having more of these facilities.

Thanks, Ky

Hello

Please find attached Perth Energy's submission to Rule Change Proposal RC_2010_14 - Certification of Reserve Capacity.

regards

Jenni Conroy
