1. Please provide your views on the proposal, including any objections or suggested revisions

LGP supports the Draft Rule Change Report.

In response to the IMO's request for further comments, we note that DSM is of increasing importance and we consider that it is not sufficiently represented on MAC by virtue of it being an innovative and leading-edge field of operation. We also consider that the IMO must ensure that DSM properly contributes to system security and we perceive that substantial review of the Market Rules is required to ensure this.
