Submission

1. Please provide your views on the proposal, including any objections or suggested revisions

LGP supports the Rule Changes Proposal on the grounds that it provides for partial commissioning of Intermittent Generators and the removal of Capacity Refunds in respect of the proportion of the Facility that is contributing to the system.

2. Please provide an assessment, whether the change will better facilitate the achievement of the Market Objectives

LGP considers the changes to support Market Objectives a), b), c) and d) and to be in harmony with e). In particular, we consider that objective c) (avoidance of discrimination) is significantly enhanced.

3. Please indicate if the proposed change will have any implications for your organisation, (for example changes to your IT or business systems) and any costs involved

LGP would incur no organisational costs as a consequence of adopting the change.

4. Please indicate the time required for your organisation to implement the change, should it be accepted as proposed

LGP would be able to implement this Rule Change immediately.
