Date submitted:	26 August 2011

Submission

1. Please provide your views on the proposal, including any objections or suggested revisions

LGP supports the Rule Change Proposal on the grounds that a Curtailable Load should comply with the obligations of all applicable contracts, and its rights under its contract with the IMO should not interfere with its obligations in its separate arms-length contract with Western Power Networks. We consider the fact that the current arrangements appear to facilitate such interference to be a manifest error.

2. Please provide an assessment, whether the change will better facilitate the achievement of the Market Objectives

LGP considers that the proposed Rule Change is consistent with all the Market Objectives and improves the integrity of the Market Rules by correcting the error.

3. Please indicate if the proposed change will have any implications for your organisation, (for example changes to your IT or business systems) and any costs involved

The change will have no impact in LGP

4. Please indicate the time required for your organisation to implement the change, should it be accepted as proposed

LGP would welcome immediate implementation.
