Date submitted:	7 March 2012

Submission

1. Please provide your views on the proposal, including any objections or suggested revisions

LGP supports the Rule Change Proposal on the grounds that it harmonises the availability of a Demand Side Program with the duty of the load it serves.

LGP also supports the "High" urgency classification of this issue as it should be remedied prior to the next Capacity Cycle. On that basis, we consider it to be correcting a manifest error.

2. Please provide an assessment, whether the change will better facilitate the achievement of the Market Objectives

LGP supports System Management's contention that the changes facilitate Market Objective a) - economically efficient, safe and reliable production and supply of electricity. We also consider it to be consistent with the other Market objectives.

3. Please indicate if the proposed change will have any implications for your organisation, (for example changes to your IT or business systems) and any costs involved

LGP will be unaffected by the change.

4. Please indicate the time required for your organisation to implement the change, should it be accepted as proposed

Not applicable
