Date submitted:	26 October 2012

Submission

1. Please provide your views on the proposal, including any objections or suggested revisions

Community Electricity supports this Rule Change Proposal on the grounds that the commissioning of new generation may reasonably take longer than 4 months, and that commissioning generators should be coordinated by System Management. We consider the present 4 month limit to be a manifest error and support processing the Rule Change Proposal according to the Fast Track Procedure.

2. Please provide an assessment, whether the change will better facilitate the achievement of the Market Objectives

We consider the Rule Change Proposal to support Market Objective a) (economically efficient, safe and reliable production of electricity), and to be consistent with the other objectives.

3. Please indicate if the proposed change will have any implications for your organisation, (for example changes to your IT or business systems) and any costs involved

Not applicable

4. Please indicate the time required for your organisation to implement the change, should it be accepted as proposed

Not applicable
