Address:	GPO Box 909 West Perth 6872
Date submitted:	6 February 2013

Submission

1. Please provide your views on the proposal, including any objections or suggested revisions

Community Electricity supports the Rule Change Proposal on the grounds that it removes an administrative obligation that imposes unnecessary costs on both System Management and Market Participants. In particular, we note synchronisation of distribution-connected generators is controlled by means of an “enable” signal from System Management, and that if synchronisation is not authorised, then this signal will be disabled.

2. Please provide an assessment, whether the change will better facilitate the achievement of the Market Objectives

Community considers that the Rule Change is consistent with all the Market Objectives. In particular, it improves the integrity and fitness for purpose of the Market Rules by reducing unnecessary and ritualistic bureaucracy.

3. Please indicate if the proposed change will have any implications for your organisation, (for example changes to your IT or business systems) and any costs involved

The proposal has no implications for Community.

4. Please indicate the time required for your organisation to implement the change, should it be accepted as proposed

Not applicable
