Date submitted:	9 April 2013

Submission

1. Please provide your views on the proposal, including any objections or suggested revisions.

Verve Energy supports the Rule Change Proposal to exclude Load Following Ancillary Services quantities from the daily Ancillary Services files.

2. Please provide an assessment whether the change will better facilitate the achievement of the Market Objectives.

Verve Energy has not undertaken an assessment of this Rule Change Proposal against the Wholesale Market Objectives.

3. Please indicate if the proposed change will have any implications for your organisation (for example changes to your IT or business systems) and any costs involved in implementing these changes.

Verve Energy will need to implement some minor IT changes to its VBA coding and spreadsheet formulas in order to implement the proposed amendments. Verve Energy considers that the costs of implementing these changes will be minor.

4. Please indicate the time required for your organisation to implement the change, should it be accepted as proposed.

As noted above, Verve Energy will need to implement some minor IT changes in order to implement the proposed amendments. In order to allow sufficient time for undertaking these IT changes and to allow sufficient time for testing Verve Energy requests that the IMO revise its proposed commencement date from 1 May 2013 to at least 15 May 2013.
