Date submitted:	6 December 2010

Submission

1. Please provide your views on the proposal, including any objections or suggested revisions

LGP supports the Rule Change per the IMO's and System Management's contention that System Management should not be provided Standing Data pertaining to pricing.

2. Please provide an assessment, whether the change will better facilitate the achievement of the Market Objectives

LGP perceives the changes to support Market Objective a) (promote the economically efficient, safe and reliable production and supply of electricity) by means of quarantining commercial information on a need-to-know basis.

3. Please indicate if the proposed change will have any implications for your organisation, (for example changes to your IT or business systems) and any costs involved

LGP would incur no organisational costs as a consequence of adopting the change.

4. Please indicate the time required for your organisation to implement the change, should it be accepted as proposed

LGP would be able to implement this Rule Change immediately.
