

Notice

3 January 2018

Ancillary service margin peak and margin off-peak parameter values 2018–19

PUBLICATION OF ISSUES PAPER AND INVITATION FOR SUBMISSIONS

The Australian Energy Market Operator (AEMO) submitted a proposal to the Economic Regulation Authority (ERA) on the values of the ancillary service margin peak and margin off-peak parameters for the period 1 July 2018 to 30 June 2019. This is required under clause 3.13.3A(a) of the Wholesale Electricity Market Rules.

The determined values are used by AEMO in calculating the market settlement payment to Synergy for providing a spinning reserve ancillary service in the Wholesale Electricity Market.

The ERA has prepared an issues paper to assist interested parties wishing to make submissions. The issues paper outlines the scope of the ERA's role under the market rules and sets out matters the ERA takes into account when assessing AEMO's proposal against the criteria in the Wholesale Electricity Market Rules.

The issues paper is available on the ERA's [website](#).

Invitation for submissions

The ERA invites interested parties to make submissions on the issues paper.

Submissions close 4:00pm (WST) on Monday 5 February 2018.

Submissions should be lodged online using the form on our website www.erawa.com.au/consultation.
