2 July 2018

## Approval of 2018/19 Ancillary Services Requirements

The Economic Regulation Authority (ERA) has completed its audit of the Australian Energy Market Operator's (AEMO) ancillary services requirements and plan for 2018/19.

Ancillary services are required to maintain power system security and reliability, and ensure that electricity supplies are of acceptable quality.

AEMO is required to submit its requirements to the ERA for audit and approval.

These requirements are set out in AEMO's 2018/19 Ancillary Services Report available on its [website](#).

The ERA has approved AEMO's 2018/19 ancillary services requirements.

AEMO's report states that rapidly changing levels of output from rooftop photovoltaic systems and increases in non-scheduled generation capacity are emerging challenges for the market.

The ERA recommends that AEMO consider these changes when estimating future years' requirements.

The ERA's audit and approval report is available on our [website](#).
