## Water Supply, Sewerage and Irrigation Performance Data 2018

The Economic Regulation Authority has published performance data for water, sewerage and irrigation licensees for the year ending 30 June 2018.

### Water and sewerage services

Small water and sewerage service licensees supplying fewer than 1,000 connected properties are required to report annually to the ERA.

The data provided is for a range of non-financial performance indicators, which are a sub-set of those reported by the larger service providers.<sup>1</sup>

There are two datasheets, one for [potable water supply](#) and the other for [sewerage services](#).

### Irrigation services

The [irrigation datasheet](#) covers three licensed irrigators in the State; Gascoyne Water Cooperative, Harvey Water (South West Irrigation Cooperative) and Ord Irrigation Cooperative.
