Parties

ELECTRICITY NETWORKS CORPORATION ABN 18 540 492 861, a statutory body corporate established under section 4(1)(b) of the *Electricity Corporations Act 2005 (WA)*, of 363 Wellington Street, Perth, Western Australia (**Western Power**)

– and –

[] of [] (**User**)

Introduction

- (A) The User wishes to obtain Metering Services from Western Power in accordance with the provisions of this Agreement, Western Power’s Access Arrangement and the User’s Access Contract.
- (B) This Agreement sets out the terms and conditions, pursuant to the Code, upon which Western Power will provide the Metering Services to the User.

Operative Provisions

1. Interpretation

1.1 Interpretation

In this Agreement:

- (a) a reference to:
 - (i) the singular includes the plural and the plural includes the singular; and
 - (ii) an officer or body of persons includes any other officer or body for the time being exercising the powers or performing the functions of that officer or body; and
 - (iii) this Agreement or any other instrument includes any variation or replacement of it; and
 - (iv) “**under**” includes “**by**”, “**by virtue of**”, “**pursuant to**” and “**in accordance with**”; and
 - (v) “**day**” means a calendar day; and
 - (vi) “**person**” includes a public body, company, or association or body of persons, corporate or unincorporated; and
 - (vii) a person includes a reference to the person's personal representatives, executors, administrators, successors and permitted assigns; and
 - (viii) any monetary amount means that amount in Australian dollars,and
- (b) a word of any gender includes the corresponding words of each other gender; and
- (c) if a period of time is specified and dates from a given day or the day of an act or event, it is to be calculated exclusive of that day; and
- (d) “**copy**” includes a facsimile copy, photocopy or electronic copy; and
- (e) “**including**” and similar expressions are not words of limitation; and
- (f) where a word or expression is given a particular meaning, other parts of speech and grammatical forms of that word or expression have a corresponding meaning; and

- (g) where information is set out in braces (namely “{**and**}”), whether or not preceded by the expression “**Note**”, “**Outline**” or “**Example**”, the information:
 - (i) is provided for information only and does not form part of this Agreement; and
 - (ii) is to be disregarded in interpreting this Agreement; and
 - (iii) might not reflect amendments to this Agreement or other documents or Laws, and
- (h) unless the contrary intention is apparent, a term with a defined meaning in the Code has the same meaning in this Agreement; and
- (i) a reference to:
 - (i) this Agreement includes any Schedule to this Agreement; and
 - (ii) a clause is a reference to a clause of this Agreement; and
 - (iii) a series of consecutive clauses or Schedules is to be read as inclusive of the first and last in the series.

1.2 Interpretation Act applies

Unless the contrary intention is apparent, the rules of interpretation in the [Interpretation Act 1984 \(WA\)](#) apply to the interpretation of this Agreement.

1.3 WPI adjustment

In this Agreement, “**WPI-Adjusted**” in reference to an amount means that amount is adjusted under the following formula:

$$N = C \times \left(1 + \frac{WPI_n - WPI_c}{WPI_c}\right)$$

where:

“**N**” is the new amount being calculated; and

“**C**” is the current amount being adjusted; and

“**WPI_n**” is the WPI applicable at the end of the calendar quarter (quarter _n) most recently ended prior to the current adjustment date; and

“**WPI_c**” is the value of WPI applicable for the calendar quarter occurring 12 months before the calendar quarter referred to in the definition of WPI_n.

2. Duration

2.1 Term

This Agreement commences on the Commencement Date and continues until this Agreement is terminated, in accordance with this Agreement.

2.2 Termination

This Agreement will only terminate if and when the User’s Access Contract terminates but such termination is without prejudice to any rights, remedies, powers, obligations or liabilities of a Party in respect of this Agreement which arose prior to the date of termination.

3. Services

3.1 Metering Services

During the Term:

- (a) Western Power must provide the Metering Services comprised in Reference Services (Metering), in accordance with the Code or as requested by the User under a Service Order;
- (b) the User must pay for Extended Metering Services provided by Western Power pursuant to a Service Order submitted by the User; and
- (c) the User may use the Metering Services, on the terms and conditions set out in this Agreement.

3.2 Service Standards

- (a) Western Power must provide the Metering Services to the User in accordance with the Service Standards.
- (b) Western Power is not in breach of this Agreement or the Service Standards if it is not (acting reasonably) able to provide a Metering Service:
 - (i) because appropriate access to a property is not provided to it;
 - (ii) because it or its employees or agents have a legitimate concern about their ability to safely access a property (including due to risk of attack by animals, threats of violence or unsafe conditions at the property); or
 - (iii) due to other impediments beyond Western Power's reasonable control and which Western Power cannot, acting reasonably, overcome.

3.3 Request for Metering Services

The User may request the provision of Metering Services under this Agreement, by submitting to Western Power a Service Order in accordance with the Code and the Communication Rules.

3.4 Requirement for Access Contract

The User may only request Metering Services for a Meter for which the User has agreed an Access Contract with Western Power for the Connection Point.

4. Financial Covenants by User

4.1 Metering Services Charges

- (a) The User agrees to pay Western Power the Fees for the Extended Metering Services provided under this Agreement.
- (b) For the avoidance of doubt, for Reference Services (Metering) a Reference Tariff is payable by the User under the User's Access Contract, and such Reference Tariffs must be paid by the User in accordance with the terms of the User's Access Contract.
- (c) If the User requests the following Extended Metering Services and the test reveals that the Meter that was the subject of the test does not comply with the requirements of the Code, the User is not liable to pay any Fees applicable to those Extended Metering Services:
 - (i) Meter Test – Laboratory (single phase);
 - (ii) Meter Test – Laboratory (three phase);
 - (iii) Meter Test – On Site (single phase);

- (iv) Meter Test – On Site (three phase); or
 - (v) Meter Test – On Site (CT Metering).
- (d) Where a User requests a Reference Service (Metering), which requires the provision of one or more Extended Metering Services to satisfy the eligibility criteria, Western Power will provide the Extended Metering Service and the User will pay the fees set out in Schedule 5 for that Service in addition to any Reference Tariff payable.

5. Invoicing and payment

5.1 Invoices

Western Power must, within 10 Business Days after the end of an Accounting Period, issue to the User a Tax Invoice for the Accounting Period showing:

- (a) all amounts payable by the User to Western Power under this Agreement for the Accounting Period; and
- (b) all outstanding amounts as at the end of the Accounting Period and interest payable on those amounts; and
- (c) GST payable on those amounts under clause 5.6.

5.2 Payment of invoices

- (a) Subject to clause 5.3, the User must, on or before the Due Date of the Tax Invoice, pay to Western Power all amounts shown on the Tax Invoice which are payable under this Agreement.
- (b) If the User fails to comply with clause 5.2(a) then, without prejudice to Western Power's other rights, the User must pay interest on any unpaid amount, calculated daily at the Prescribed Rate from the Due Date of the Tax Invoice until payment.

5.3 Disputed invoices

- (a) If the User Disputes any amount set out in a Tax Invoice issued under clause 5.1 then the User must pay the Undisputed Portion (if any) and must, prior to the Due Date of the Tax Invoice, give notice to Western Power that it Disputes the amount and provide in that notice full details of the Dispute. Provided the User has complied with the foregoing requirements, it may withhold payment of the disputed portion of the Tax Invoice until the Dispute is resolved.
- (b) Without prejudice to Western Power's other rights, any amount withheld by the User under clause 5.3(a) but subsequently found to have been payable, attracts interest calculated daily at the Prescribed Rate from the Due Date of the Tax Invoice until payment.
- (c) Without prejudice to Western Power's other rights, any amount paid by the User under clause 5.3(a) but subsequently found not to have been payable, attracts interest calculated daily at the Prescribed Rate from the date the User paid the amount to the date Western Power repays the amount.

5.4 Under and over payments

- (a) If a Party detects a Payment Error by a Party of any amount within 18 calendar months after the Payment Error:
 - (i) the Party must as soon as reasonably practicable give notice to the other Party of the Payment Error; and

- (ii) an adjusting payment must be made by the appropriate Party within 15 Business Days of the notice.
- (b) Except where clause 5.4(c) applies, the adjusting payment must, without prejudice to the Party's other rights, include interest calculated daily at the Prescribed Rate from the date of the Payment Error until the date of the adjusting payment.
- (c) An adjusting payment by a Party will not attract interest under clause 5.4(b) if it is made in relation to an underpayment and the underpayment was the result of an error by the other Party.
- (d) A Party is not entitled to an adjusting payment for a Payment Error notified to the other Party after the expiry of 18 calendar months after the Payment Error.
- (e) Where a Payment Error is an error as a result of which the amount set out in a Tax Invoice is less than what it would have been had the error not been made, the Payment Error will be taken to have occurred on the Due Date of the Tax Invoice.
- (f) Where a Payment Error is an error as a result of which the amount set out in a Tax Invoice is more than what it would have been had the error not been made, the Payment Error will be taken to have occurred on the date the User has paid the total amount of the Tax Invoice in full.

5.5 Default in payment

If the User Defaults in due and punctual payment of a Tax Invoice, clause 9(a) applies.

5.6 GST

- (a) Unless expressly included, the consideration for any supply under or in connection with this Agreement (including any Fees) is GST exclusive.
- (b) To the extent that any supply made under or in connection with this Agreement is a taxable supply and the price for it (including any Fees) is stated to be GST exclusive, the consideration for that supply is increased by an amount determined by the supplier, not exceeding the amount of the consideration (or its market value) multiplied by the rate at which GST is imposed in respect of the supply.
- (c) Without limiting the obligation to provide a Tax Invoice under clauses 5.1, the supplier must issue a Tax Invoice to the recipient of a supply to which clause 5.6(b) applies before the payment of the GST inclusive consideration determined under that clause.
- (d) If a Party is entitled under this Agreement to be reimbursed or indemnified by another Party for a cost or expense incurred in connection with this Agreement, the reimbursement or indemnity payment must not include any GST component of the cost or expense for which an input tax credit may be claimed by the Party entitled to be reimbursed or indemnified, or by its representative member.
- (e) If a Party becomes aware of an adjustment event, that Party agrees to notify the other Party as soon as practicable after becoming so aware, and the Parties agree to take whatever steps are necessary, including the issue of an adjustment note, and to make whatever adjustments are required, to ensure that any GST or additional GST on that supply or any refund of any GST (or part of GST) is paid as soon as is practicable but no later than 10 Business Days after the Party has satisfied itself that the adjustment event has occurred.
- (f) Definitions in the GST Act apply also in this clause 5.6 unless the context indicates otherwise.

Common Provisions

6. Representations and warranties

6.1 The User's representations and warranties

- (a) The User represents and warrants to Western Power that:
 - (i) the User's obligations under this Agreement are valid and binding and are enforceable against the User under their terms; and
 - (ii) this Agreement and any other transaction under it does not contravene the User's constituent documents or any Law or any of the User's obligations or undertakings by which the User or any of the User's assets are bound or cause to be exceeded any limitation on the User's or the User's directors' powers; and
 - (iii) neither the User nor any of its related bodies corporate have immunity from the jurisdiction of a court or from legal process (whether through service of notice, attachment prior to judgment, attachment in aid of execution, execution or otherwise).
- (b) The representations and warranties in clause 6.1(a) are to be taken to be made on each day on which:
 - (i) this Agreement is in effect; or
 - (ii) any amount payable by the User to Western Power under this Agreement is or may be outstanding.
- (c) To the maximum extent permitted by Law, the only warranties given by and terms which apply to the User under this Agreement are those expressly contained in this Agreement, and all warranties and terms implied by Law, including those on the part of the User implied by the Competition and Consumer Act 2010 (Cth) or the Fair Trading Act 2010 (WA) or any other Law to similar effect do not apply to this Agreement.
- (d) If at Law the exclusion of any warranty or term is prohibited, then the User's liability in respect of a breach of such warranty or term is limited to the maximum extent permitted by Law. For example, where any Law permits the User to limit its liability in respect of a breach of an implied warranty or condition to the replacement or resupply of equivalent goods and services, then the User's liability will be so limited.

6.2 Western Power's representations and warranties

- (a) Western Power represents and warrants to the User that:
 - (i) Western Power's obligations under this Agreement are valid and binding and are enforceable against Western Power under their terms; and
 - (ii) this Agreement and any other transaction under it does not contravene Western Power's constituent documents or any Law or any of Western Power's obligations or undertakings by which Western Power or any of Western Power's assets are bound or cause to be exceeded any limitation on Western Power's or Western Power's directors' powers; and
 - (iii) neither Western Power nor any of its related bodies corporate have immunity from the jurisdiction of a court or from legal process (whether through service of notice, attachment prior to judgment, attachment in aid of execution, execution or otherwise).
- (b) The representations and warranties in clause 6.2(a) are to be taken to be made on each day on which:
 - (i) this Agreement is in effect; or

- (ii) any amount payable by Western Power to the User under this Agreement is or may be outstanding.
- (c) To the maximum extent permitted by Law, the only warranties given by and terms which apply to Western Power under this Agreement are those expressly contained in this Agreement, and all warranties and terms implied by Law, including those on the part of Western Power implied by the Competition and Consumer Act 2010 (Cth) or the Fair Trading Act 2010 (WA) or any other Law to similar effect do not apply to this Agreement.
- (d) If at Law the exclusion of any warranty or term is prohibited, then Western Power's liability in respect of a breach of such warranty or term is limited to the maximum extent permitted by Law. For example, where any Law permits Western Power to limit its liability in respect of a breach of an implied warranty or condition to the replacement or resupply of equivalent goods and services, then Western Power's liability will be so limited.

7. Liability

7.1 Exclusion of Indirect Damage

- (a) The User is not in any circumstances liable to Western Power for any Indirect Damage suffered by Western Power, however arising.
- (b) Western Power is not in any circumstances liable to the User for any Indirect Damage suffered by the User, however arising.

7.2 Limitation of liability

The maximum liability of one Party to the other Party under and in connection with this Agreement is limited to the amount equal to:

- (a) the aggregate monetary limit on that Party's liability under the User's Access Contract applicable to all breaches of, or acts or omissions in connection with, the User's Access Contract ("**Access Contract Cap**"); less
- (b) the aggregate actual liability incurred by that Party to the other Party under the User's Access Contract, to the intent that each Party's aggregate liability under this Agreement and the User's Access Contract will not exceed the Access Contract Cap applicable to it. If a Party receives an amount of damages under this Agreement which, when aggregated with any amounts it has received under the User's Access Contract, results in the Access Contract Cap being exceeded it must refund the excess amount received over the Access Contract Cap to the other Party.

Payments of charges for services, GST and interest are not taken into account in determining whether the Access Contract Cap has been exceeded.

7.3 Personal Injury

Clauses 7.1 and 7.2 do not apply to personal injury Claims. The liability for any personal injury Claim will be determined under Law.

7.4 Fraud

- (a) If Western Power is fraudulent in respect of its obligations to the User under this Agreement, then Western Power is liable to the User for, and is to indemnify the User against, any damage caused by, consequent upon or arising out of the fraud. In this case, the exclusion of Indirect Damage in clause 7.1 does not apply.

- (b) If the User is fraudulent in respect of its obligations to Western Power under this Agreement, then the User is liable to Western Power for, and is to indemnify Western Power against, any damage caused by, consequent upon or arising out of the fraud. In this case, the exclusion of Indirect Damage in clause 7.1 does not apply.
- (c) A Party must take such action as is reasonably required to mitigate any loss or damage to it for which indemnity may be claimed under this Agreement or otherwise.

7.5 Interaction with ETAC

Nothing in this clause 7 limits the operation of any provision in the User's Access Contract providing that "the exclusion of Indirect Damage does not apply" or words to similar effect.

8. Force Majeure

8.1 Affected Person's obligations are suspended

If a Party ("**Affected Person**") is unable wholly or in part to perform any obligation ("**Affected Obligation**") under this Agreement (other than an obligation to pay money) because of the occurrence of a Force Majeure Event, then, subject to this clause 8.1, the Affected Person's obligation to perform the Affected Obligation is suspended to the extent that, and for so long as, the Affected Person's ability to perform the Affected Obligation is affected by the Force Majeure Event (such period being the "**FM Period**").

8.2 Affected Person's obligations

Subject to clauses 8.3 and 8.5, if a Force Majeure Event occurs and the Affected Person is unable wholly or in part to perform any obligation under this Agreement, then the Affected Person must:

- (a) notify the other Party if the FM Period continues for a period of two days or longer; and
- (b) use reasonable endeavours (including incurring any reasonable expenditure of funds and rescheduling personnel and resources) to:
 - (i) mitigate the consequences of the Force Majeure Event; and
 - (ii) minimise any resulting delay in the performance of the Affected Obligation.

8.3 In case of breach

An Affected Person is not obliged to incur an expenditure in complying with clause 8.2(b) if the Force Majeure Event is constituted by a breach of, or failure to comply with, this Agreement by the other Party.

8.4 Failure to minimise delays

If an Affected Person fails to comply with clause 8.2(b)(ii), then the only consequence of that failure is that the FM Period is reduced by the period of any delay in the performance of the Affected Obligation attributable to that failure.

8.5 Settlement of a labour dispute

The settlement of a labour dispute which constitutes a Force Majeure Event is a matter which is within the absolute discretion of the Affected Person.

9. Default

- (a) If the User defaults in the due and punctual payment, at the time and in the manner required for payment by this Agreement, of any amount payable under this Agreement (“Default”), then Western Power may:
 - (i) notify the User of the User’s Default and require the User to remedy the User’s Default; and
 - (ii) if the User’s Default has not been remedied at the end of the 20th Business Day after the notice was given, suspend the provision of the Extended Metering Services.
- (b) If the Extended Metering Services are suspended by Western Power under clause 9(a), Western Power must continue to provide the Standard Metering Services in respect of the Metering Points which are affected by the suspension.
- (c) For the avoidance of doubt, nothing in clause 9(b) impacts Western Power’s right to suspend services under the User’s Access Contract, including the Standard Metering Services, in accordance with the terms of the User’s Access Contract.
- (d) The exercise of any of the remedies set out in clause 9(a) by Western Power does not prejudice the rights or remedies accrued to Western Power at the date of the User’s Default.

10. Disputes

10.1 Disputes

Any Dispute arising in respect of any matter under or in connection with this Agreement shall be resolved in accordance with the provisions set out in Part 8 of the Code.

10.2 Performance to Occur Despite Dispute

The Parties shall continue to perform their obligations under this Agreement notwithstanding the existence of a Dispute.

11. Set off

11.1 Party may set off payment

A Party (“**First Party**”) may set off any amount due for payment by it to the other Party under this Agreement against any amount which is due for payment by the other Party to the First Party under this Agreement.

11.2 No other set off permitted

Except as permitted in clause 11.1, no set off is permitted by either Party in connection with this Agreement, whether under this Agreement or otherwise.

12. Assignment and Encumbrances

- (a) Subject to clause 12(c), a User may not encumber, assign, part with possession or create any interest or right in favour of a third party in respect of this Agreement, without the prior written consent of Western Power, which will not be unreasonably withheld.
- (b) Subject to clause 12(c), Western Power may not encumber, assign, part with possession or create any interest or right in favour of a third party in respect of this Agreement, without the prior written consent of the User, which will not be unreasonably withheld.
- (c) If a Party is restructured in accordance with government policy:

- (i) by Law; or
- (ii) through other means, including the:
 - (A) use of subsidiary or associated companies; or
 - (B) transfer of assets, rights and liabilities,

then the rights and obligations of a Party under this Agreement are assigned to the appropriate legal entity pursuant to the restructure. A restructure, transfer or assignment under this clause 12(c) does not require the other Party's approval or consent.

13. Miscellaneous

13.1 Compliance

Each Party to this Agreement must comply with all applicable Laws.

13.2 Precedence

Where there is any ambiguity or conflict between the Code and the provisions of this Agreement, the provisions of the Code shall prevail to the extent necessary to resolve that ambiguity or conflict. Where there is any ambiguity or conflict between this Agreement and the Access Contract, the provisions of the Access Contract shall prevail to the extent necessary to resolve that ambiguity or conflict.

13.3 Variation

A purported agreement between Western Power and the User to revoke, substitute or amend any provision of this Agreement has no effect unless it is in writing.

13.4 No third-party benefit

This Agreement does not confer any right or benefit on a person other than the User and Western Power, despite the person being named or identified, or belonging to a class of persons named or identified, in this Agreement.

13.5 Duty

The User is liable for and must pay any duty that is assessed on this Agreement under the *Duties Act 2008 (WA)*. If it is dutiable, the User must produce this Agreement to the Office of State Revenue for assessment.

13.6 Costs

Each Party must pay its own costs, charges, expenses, disbursements or fees in relation to:

- (a) the negotiation, preparation, execution, performance, amendment or registration of, or any notice given or made; and
- (b) the performance of any action by that Party in compliance with any liability arising, under this Agreement, or any agreement or document executed or effected under this Agreement, unless this Agreement provides otherwise.

13.7 Waiver

A provision of this Agreement may only be waived by a Party giving written notice signed by a duly authorised representative to the other Party.

13.8 Entire agreement

This Agreement constitutes the entire agreement between the Parties as to its subject matter and, to the extent permitted by Law, supersedes all previous agreements, arrangements, representations or understandings.

13.9 Severance

If the whole or any part of this Agreement is void, unenforceable or illegal in a jurisdiction, it is severed for that jurisdiction. The remainder of this Agreement has full force and effect and the validity or enforceability of the provision in any other jurisdiction is not affected. This clause 13.9 has no effect if the severance alters the basic nature of this Agreement or is contrary to public policy.

13.10 Counterpart execution

- (a) This Agreement may be signed in any number of counterparts and all such signed counterparts, taken together, shall be deemed to constitute one and the same instrument even though all Parties may not have signed each separate counterpart.
- (b) Where it has been signed in counterparts, the date of this Agreement shall be taken to be the day on which the last of the Parties to give such notice gives notice in writing or by fax or electronic mail to the other Parties that it has signed a counterpart, such notice being accompanied by a copy, or a printable Electronic image, of the whole of that counterpart.

13.11 Further assurance

Each Party agrees, at its own expense, on the request of another Party, to do everything reasonably necessary to give effect to this Agreement and the transactions contemplated by it, including, but not limited to, the execution of documents.

13.12 Merger

The warranties, undertakings and indemnities in this Agreement do not merge on termination of this Agreement.

13.13 Remedies

The rights, powers and remedies provided in this Agreement are cumulative with and not exclusive of the rights, powers or remedies provided by law independently of this Agreement.

13.14 Governing Law

- (a) This Agreement and the transactions contemplated by this Agreement are governed by the Law in force in Western Australia.
- (b) Without limiting clause 13.14(a), each Party irrevocably and unconditionally submits to the non-exclusive jurisdiction of the Courts of Western Australia and the Courts of appeal from them for the purpose of determining any Dispute concerning this Agreement or the transactions contemplated by this Agreement.

Schedule 1 – Dictionary

In this Agreement, unless the context otherwise requires, the defined terms in column 1 below have the meanings in column 2:

<u>Column 1</u>	<u>Column 2</u>
Access Arrangement	means the current 'access arrangement' (as defined in the Access Code) approved in respect of the Network under the Access Code.
Access Code	means the <u><i>Electricity Networks Access Code 2004 (WA)</i></u> .
Access Contract	has the meaning given to it in the Code.
Accessory Metering Services - Reference Services (Metering)	means those Metering Services requested by a User under this Agreement as set out in section 3 of Schedule 3.
Accounting Period	means one calendar month.
Accumulated Energy Data	has the meaning given to it in the Code.
Accumulation Meter	has the meaning given to it in the Code.
Act	means the <u><i>Electricity Industry Act 2004 (WA)</i></u> .
Actual Change Date	means the effective date of change recorded in the Registry.
Actual Value	has the meaning given to it in the Code.
Additional Metering Service	means an alternative to the default scheduled Energy Data provision Standard Metering Service selected by the User and applicable as a component of a Reference Service as described in Schedule 2.
Additional Reference Service (Metering)	means the Reference Service (Metering) comprised of an Additional Metering Service.
Agreement	means this Agreement.
B2B	means business to business.
Build Pack	has the meaning given to it in the Communication Rules.
Business Day	means a day that is not a Saturday, Sunday or public holiday in Perth, Western Australia.
Claim	means any claim, demand, action or proceeding made or instituted against a Party.
Code	means the <u><i>Electricity Industry (Metering) Code 2012 (WA)</i></u> .
Commencement Date	means the date of execution of this Agreement or the date this Agreement is deemed to commence by operation of clause 5.2 of the Code (as applicable).
Communication Rules	has the meaning given to it in the Code.
Connection Point	has the meaning given to it in the Code.

Consumer	has the meaning given to it in the Access Code.
Country	means an area not defined as Metropolitan.
Customer	means: (a) a “customer” as defined in section 3 of the Act; or (b) a customer of the User who owns, operates or controls Generating Plant.
Customer Transfer Code	means the <u>Electricity Industry (Customer Transfer) Code 2016 (WA)</u> .
Customer Transfer and Standing Data Procedure	means the Customer Transfer and Standing Data Procedure defined in the Build Pack published by Western Power from time to time.
Current Transformer Metering	means a Metering Installation which incorporates a transformer/s for the measurement of electricity flow.
Customer Prevented	means a Service Order which could not be completed by Western Power due to an action taken by a Customer.
De-energise	means the removal of the supply voltage from the Meter at the Metering Point.
Default	has the meaning given to it in clause 9(a).
Dispute	means any dispute or difference concerning: (a) construction of; or (b) anything contained in or arising out of; or (c) rights, obligations, duties or liabilities of a Party under, this Agreement.
Due Date	means the date 15 Business Days after the Tax invoice is received by the Party to whom it is addressed.
Electrical Contractor	has the meaning given to it in the <u>Electricity (Licensing) Regulations 1991 (WA)</u> .
Energise	has the meaning given to it in the <u>Electricity Industry (Obligation to Connect) Regulations 2005 (WA)</u> .
Energy Data	has the meaning given to it in the Code.
Extended Metering Services	means those Metering Services identified as such in Schedule 2 and described in section 4 of Schedule 3.
Facilities and Equipment	has the meaning given to it in the Access Code.
Fees	means the fees that are published by Western Power from time to time as being the fees which apply to the provision of Additional Metering Services and Extended Metering Services. The Fees applicable are set out in Schedule 5 of this Agreement.
Field Completion Date	means the date on which the Service requested in a Service Order is completed or attempted at the supply address as reflected in the

mandatory "Actual Date And Time" field in B2B Service Order transaction data.

Force Majeure

has the meaning given to it in the User's Access Contract, however if the term is not defined in the User's Access Contract, then the term will have the following meaning:

in respect of a Party, means an event or circumstance beyond the Party's control, and which the Party, acting as a Reasonable and Prudent Person, is not able to prevent or overcome, including (where the foregoing conditions are satisfied):

- (a) any act of God, lightning, earthquake, storm, fire, flood, subsidence, land slide, mud slide, wash-out, explosion or natural disaster; or
- (b) any insurrection, revolution or civil disorder, terrorism, act of public enemies, malicious damage, sabotage, vandalism, war (whether declared or undeclared) or a military operation, blockade or riot; or
- (c) any determination, award or order of any court or tribunal, or any regulatory authority or the award of any arbitrator arising after the Commencement Date; or
- (d) any act or omission of government or any government or regulatory department, body, instrumentality, ministry, agency, fire brigade or any other authority other than a Party (including restraint, expropriation, prohibition, intervention, direction or embargo); or
- (e) any inability or delay in obtaining any governmental, quasi-governmental or regulatory approval, consent, permit, licence or any other authority other than a Party; or
- (f) any industrial disputes of any kind, strike, lock-out, ban, limitation or other industrial disturbances; or
- (g) any significant plant or equipment failure which could not have been avoided by the exercise of Good Electricity Industry Practice; or
- (h) any act or omission of any person (other than a Party) with Facilities and Equipment connected to the Network which prevents the Party's ability to perform its obligations under this Agreement; or
- (i) any application of any law of the Commonwealth, any Commonwealth authority, the State, any State authority or any local government; or
- (j) accidents, weather and acts of third parties (such as Generators or Consumers) that affect the quality, frequency and continuity of the supply of electricity.

Force Majeure Event

means an event of Force Majeure.

Generating Plant

has the meaning given to it in the Access Code.

Generator

has the meaning given to it in the Access Code.

Good Electricity Industry Practice	has the meaning given to it in the Code.
GST	means goods and services tax or similar value added tax levied or imposed in Australia on a taxable supply under the GST Act or otherwise.
GST Act	means the <u><i>A New Tax System (Goods and Services Tax) Act 1999 (Cth)</i></u> .
High Voltage	means a voltage exceeding Low Voltage.
Indirect Damage	suffered by a person means any one or more of: <ul style="list-style-type: none"> (a) any consequential loss, consequential damage or special damages however caused or suffered by the person, including any: <ul style="list-style-type: none"> (i) loss of (or loss of anticipated) opportunity, use, production, revenue, income, profits, business and savings; or (ii) loss due to business interruption; or (iii) increased costs; or (iv) punitive or exemplary damages, whether or not the consequential loss or damage or special damage was foreseeable; or (b) in respect of contractual damages, damages which would fall within the second limb of the rule in <i>Hadley v Baxendale</i> [1854] 9 Exch. 341; or (c) any liability of the person to any other person, or any Claim brought against the person by any other person, and the costs and expenses connected with the Claim.
In Field	means a Service Order which has been processed by Western Power and allocated to a delivery resource.
Interval Energy Data	has the meaning given to it in the Code.
Interval Meter	has the meaning given to it in the Code.
Law	means 'written laws' and 'statutory instruments' as defined in the Access Code, orders given or made under a written law or statutory instrument as so defined or by a government agency or authority, Codes of Practice and Australian Standards deemed applicable under a written law and rules of the general law including the common law and equity.
Low Voltage	means a voltage exceeding 50V alternating current or 120V ripple free direct current but not exceeding 1000V alternating current or 1500V direct current.
Market Operator	means the market operator appointed under Part 9 of the Act.
Meter	has the meaning given to it in the Code.
Metering Installation	has the meaning given to it in the Code.

Metering Point	has the meaning given to it in the Code.
Metering Service	has the meaning given the Metering Service in the Code.
Meter Reading	means the collection of an Actual Value from a Meter.
Meter Reading Schedule	means a schedule published by Western Power, annually and following amendment in accordance with this Agreement, detailing Meter Reading dates for Meters.
Meter Throughput	means the measurement of electricity consumption or production at a Metering Point, accumulated over a 12 month period, expressed as a measure of energy over time.
Metrology Procedure	has the meaning given to it in the Code.
Metropolitan	has the meaning given to 'metropolitan area' in the Code.
Network	has the meaning given to it in the Access Code.
Non-Business Day	means a day that is not a Business Day.
Party	means Western Power or the User.
Parties	means Western Power and the User.
Payment Error	means: <ul style="list-style-type: none"> (a) any underpayment or overpayment by a Party of any amount in respect of a Tax Invoice; or (b) any error in a Tax Invoice (including the omission of amounts from that Tax Invoice, the inclusion of incorrect amounts in that Tax Invoice, calculation errors in the preparation of a Tax invoice or a Tax Invoice being prepared on the basis of data which is later established to have been inaccurate).
Prescribed Rate	means, at any point in time, the interest rate (expressed as a rate per cent per annum) equal to the aggregate of 3 annual percentage points and the interest rate (expressed as a rate per cent per annum) then published by the Reserve Bank of Australia as the large business variable indicator lending rate.
Price List	means the 'price list' (as defined in the Access Code) specified in the Access Arrangement.
Read or Reading	means an attempt to collect an Actual Value from a Meter.
Reading Day Number	has the meaning given to it in the Code.
Reasonable and Prudent Person	means a person acting in good faith and, where applicable, in accordance with Good Electricity Industry Practice.
Re-energise	means to restore supply voltage from a Meter at the Metering Point.

Reference Service (Metering)	means one or both of: (a) Reference Service (Metering) (standard metering service); and (b) Additional Reference Service (Metering), as the case requires.
Reference Service (Metering) (standard metering service)	means the Reference Service (Metering) comprised of the default Standard Metering Service applicable as a component of a Reference Service as described in Schedule 2.
Reference Tariff	has the meaning given to it in the Access Code.
Registry	has the meaning given to it in the Code.
Relevant Metering Service	means the Metering Service provided by Western Power comprised in Reference Services (Metering), in accordance with the Code or as requested by the User in a Service Order.
Self-Read	means a Meter Reading performed by a Customer.
Service Order	means a request for a Service submitted by the User to Western Power, in accordance with the Communication Rules.
Service Standards	means the service levels and standards applicable to the Metering Services, as set out in Schedule 4.
Standard Metering Services	means the default Metering Services applicable as a component of a Reference Service as described in Schedule 2 and in section 2 of Schedule 3.
Standing Data	has the meaning given to it in the Code.
Tax Invoice	has the meaning given to it in the GST Act.
Term	has the meaning given in clause 2.1.
Undisputed Portion	means the portion of the amount set out in a Tax Invoice that this not in Dispute.
Unmetered Supply	has the meaning given to it in section 3.9(2) of the Code.
User	has the meaning given to it in the Code.
WA B2B Procedures: Meter Data Process	means the WA B2B Procedures: Meter Data Process defined in the Build Pack published by Western Power from time to time.
WA B2B Procedures: Service Order Process	means the WA B2B Procedures: Service Order Process defined in the Build Pack published by Western Power from time to time.
WPI	means the Wage Price Index (Australia) published by the Australian Bureau of Statistics from time to time or, if the Wage Price Index (Australia) ceases to be published, such alternative index as Western Power acting reasonably and in good faith may determine.
WPI-Adjusted	has the meaning given to it in clause 1.3

Unless the contrary intention is apparent, a defined meaning in the Code or User's Access Contract has the same meaning in this Agreement.

Schedule 2 – Metering Services Classifications

Categories of Metering Services

- **Reference Services (Metering)**

Description

Reference Services (Metering) are a component of the reference service (exit service, entry service or bi-directional service).

There are two types of Reference Services (Metering):

- (a) Reference Service (Metering) (standard metering service); and
- (b) Additional Reference Service (Metering).

Each of these Reference Services (Metering) is a part of the reference service (exit service, entry service or bi-directional service). Each Reference Service (Metering) is made up of Metering Services. This section describes these Metering Services.

The Reference Service (Metering) (standard metering service) comprises the default Metering Service applicable as a component of a Reference Service. It is made up of a default Meter installation and energisation Metering Service and a default scheduled Energy Data provision Metering Service. This default Metering Service is the Standard Metering Service. For some reference services (exit service, entry service or bi-directional service), the applicable default Metering Service will depend on whether the Meter Throughput is less than 50MWh/a or 50MWh/a and above.

The Additional Reference Service (Metering) comprises an alternative scheduled Energy Data provision Metering Service selected by a User (as permitted) as a component of a reference service (exit service, entry service or bi-directional service). This selected Metering Service is an Additional Metering Service.

The description of each scheduled Energy Data provision Metering Service is set out in Table 2 of this Schedule. Table 3 of this Schedule sets out which of the scheduled Energy Data provision Metering Services are the default Reference Service (Metering) (standard metering service) and which of the scheduled Energy Data provision Metering Services are permitted for selection by a User as an Additional Reference Service (Metering) unless otherwise agreed between Western Power and the User.

The process for the:

- (a) scheduled Energy Data provision Metering Service is described in section 2.1 of Schedule 3; and
- (b) Meter installation and energisation Metering Service is described in section 2.2 of Schedule 3.

Scheduled Energy Data provision Metering Services are cyclic, that is they recur at a set frequency (for example – monthly) and without ongoing requests by the User.

Contract and fee arrangements

Reference Services (Metering) are provided under a User's Access Contract. The Metering Services comprised therein are provided in accordance with the Code and this Agreement.

For a Reference Service (Metering) (standard metering service) a Reference Tariff is payable. These Reference Tariffs are published in the Price List. These Reference Tariffs are payable under the Access Contract between the User and Western Power. The costs of a Reference Service (Metering) (standard metering service).

For an Additional Reference Service (Metering), a Reference Tariff is payable comprising an additional charge (reflecting Western Power's incremental costs) in accordance with the Price List¹. These Reference Tariffs are payable under the Access Contract between the User and Western Power. The costs of an Additional Reference Service (Metering) are recovered in those Reference Tariffs.

One-off manual Interval Read

There is one Reference Service (Metering) where the description differs from above. The Additional Reference Service (Metering) ("one-off manual Interval Read")² is not an alternative scheduled Energy Data provision Metering Service and it is not cyclic, but instead is provided upon the User's request for certain reference services (exit service, entry service or bi-directional service). It is a non-scheduled Energy Data provision Metering Service and is designated below in Table 1 as MS-20 and described more fully immediately following Table 3 of this Schedule. It remains the case, however, that the applicable Reference Tariff for the one-off manual Interval Read Metering Service is payable under the Access Contract between the User and Western Power and that the costs of this Additional Reference Service (Metering) are recovered in that Reference Tariff.

- **Accessory Metering Services - Reference Services (Metering)**

Certain Metering Services requested by a User, identified by Western Power or provided in accordance with the Code and which Western Power provides under this Agreement are an accessory to a Reference Service (Metering).

These Metering Services are identified in this Agreement as Accessory Metering Services - Reference Services (Metering) and are described more fully in section 3 of Schedule 3. Accessory Metering Services - Reference Services (Metering) are not cyclic and are referred to as 'off cycle'.

Accessory Metering Services - Reference Services (Metering) are not a component of a reference service (exit service, entry service or bi-directional service). They are provided in accordance with the Code in response to a specific request under this Agreement. The costs of Accessory Metering Services - Reference Services (Metering) are recovered in Reference Tariffs.

- **Extended Metering Services**

Extended Metering Services are Metering Services a User requests and Western Power provides under this Agreement.

Extended Metering Services are described in section 4 of Schedule 3. Extended Metering Services are not cyclic and are referred to as 'off cycle'.

¹ See footnote 2, page 37 of the 2019/20 Price List. See also sections 1.2.2 and 7.1.6 of the Price List Information for 2019/20.

² This is Reference Number M16 in Table E.1.1 of Appendix E of Access Arrangement 4.

Extended Metering Services are not a component of a reference services (exit service, entry service or bi-directional service). They are provided in response to a specific request under this Agreement.

The costs of Extended Metering Services are not recovered in Reference Tariffs and a payment is made under this Agreement. The fees for Extended Metering Services is set out in Schedule 5.

Classification of Metering Services

The Table 1 below classifies Metering Services according to whether they are Standard Metering Services, Additional Metering Services, Accessory Metering Services - Reference Services (Metering) or Extended Metering Services.

Table 1: Classification of Metering Services

No.	Meter Service Name	Classification			
		Standard	Additional	Accessory	Extended
MS-1	Scheduled Energy Data provision	✓ ³	✓ ⁴		
MS-2	Meter installation and energisation	✓			
MS-3	Standing Data provision			✓	
MS-4	Historical Energy Data provision			✓	
MS-5	Metering installation repair			✓	
MS-6	Meter upgrade/replace (not User requested)			✓	
MS-7	De-energise (manual)				✓
MS-8	Re-energise (manual)				✓
MS-9	Meter exchange				✓
MS-10	Meter investigation				✓
MS-11	Communications link installation				✓
MS-12	Communications link deactivation				✓
MS-13	Meter test (laboratory)				✓
MS-14	Meter test (on-site)				✓
MS-15	Meter reconfiguration				✓
MS-16	Enablement of signal pulse outputs				✓
MS-17	Remove Meter				✓
MS-18	Verify Meter Energy Data				✓
MS-19	Non-scheduled special Meter Reading				✓
MS-20	One-off manual Interval Read		✓ ⁵		

³ There are 15 possible scheduled Energy Data provision Metering Services. These are described in Table 2. The Reference Service (Metering) (standard metering service) includes a scheduled Energy Data provision Metering Service provided as a default Metering Service. This is a Standard Metering Service. The default Service is designated RSM in Table 3.

⁴ The Additional Reference Service (Metering) includes an alternative scheduled Energy Data Metering Service selected by a User. It is an alternative to the default Standard Metering Service. The selection is made from a permitted sub-set of the 15 possible scheduled Energy Data provision Metering Services. These permitted selections are designated ARSM in Table 3.

⁵ This Additional Reference Service (Metering) is not an alternative scheduled Energy Data Metering Service selected by a User. It is a separate non-scheduled Energy Data provision Metering Service requested by a User. It is described immediately below Table 3.

Scheduled Energy Data provision Metering Services

The Table 2 below describes the different Scheduled Energy Data provision Metering Services M1 to M15.

Table 2: Scheduled Energy Data provision Metering Services

No.	Service Name	Service Description
M1	Unidirectional, accumulation, bi-monthly, manual	Provision of Accumulated Energy Data from an Accumulation Meter (uni-directional) or Interval Meter (uni-directional) derived by way of a manual Read on a bi-monthly basis.
M2	Unidirectional, accumulation (TOU), bi-monthly, manual	Provision of Accumulated Energy Data for the time bands of the Reference Tariff for the underlying exit service from an Accumulation Meter (uni-directional) or Interval Meter (uni-directional) derived by way of a manual Read on a bi-monthly basis.
M3	Unidirectional, interval, bi-monthly, manual	Provision of Interval Energy Data from an Interval Meter (uni-directional) derived by way of a manual Read on a bi-monthly basis.
M4	Unidirectional, interval, monthly, manual	Provision of Interval Energy Data from an Interval Meter (uni-directional) derived by way of a manual Read on a monthly basis.
M5	Unidirectional, interval, bi-monthly, remote	Provision of Interval Energy Data from an Interval Meter (uni-directional) derived via a communications network on a bi-monthly basis.
M6	Unidirectional, interval, monthly, remote	Provision of Interval Energy Data from an Interval Meter (uni-directional) derived following the collection of the Interval Energy Data via a communications network on a monthly basis.
M7	Unidirectional, interval, daily, remote	Provision of Interval Energy Data from an Interval Meter (uni-directional) derived following the collection of the Interval Energy Data via a communications network on a daily basis.
M8	Bidirectional, accumulation, bi-monthly, manual	Provision of Accumulated Energy Data from an Accumulation Meter (bi-directional) derived by way of a manual Read on a bi-monthly basis.
M9	Bidirectional, accumulation (TOU), bi-monthly, manual	Provision of Accumulated Energy Data for the time bands of the Reference Tariff for the underlying bi-directional service from an Accumulation Meter (bi-directional) derived by way of a manual Read on a bi-monthly basis.
M10	Bidirectional, interval, bi-monthly, manual	Provision of Interval Energy Data from an Interval Meter (bi-directional) derived by way of a manual Read on a bi-monthly basis.
M11	Bidirectional, interval, monthly, manual	Provision of Interval Energy Data from an Interval Meter (bi-directional) derived by way of a manual Read on a monthly basis.
M12	Bidirectional interval, bi-monthly, remote	Provision of Interval Energy Data from an Interval Meter (bi-directional) derived following the collection of the Interval Energy Data via a communications network on a bi-monthly basis.
M13	Bidirectional, interval, monthly, remote	Provision of Interval Energy Data from an Interval Meter (bi-directional) derived following the collection of the Interval Energy Data via a communications network on a monthly basis.
M14	Bidirectional, interval, daily, remote	Provision of Interval Energy Data from an Interval Meter (bi-directional) derived following the collection of the Interval Energy Data via a communications network on a daily basis.
M15	Unmetered supply, accumulation, bi-monthly, manual	Provision of the Metering Services set out in the Code for a type 7 Connection Point.

Scheduled Energy Data provision Metering Services - default and permitted selections

The Table 3 below describes the default Scheduled Energy Data provision Metering Service for each Reference Service and each of the other Scheduled Energy Data provision Metering Services which Users are permitted to select for each Reference Service.

Table 3: Scheduled Energy Data provision Metering Services - default (RSM) and permitted selections (ARSM)

In this table:		Reference Service (Metering)														
		M1	M2	M3	M4	M5	M6	M7	M8	M9	M10	M11	M12	M13	M14	M15

Non-scheduled Energy Data provision Metering Service (“one-off manual Interval Read”)⁶ – MS-20

This is an Additional Reference Service (Metering) available for selection with Reference Services A1 – A4, A12 – A17 and C1 – C4 and C9 – C14.

This Metering Service may be requested by the User to obtain Interval Energy Data collected as a manual Read from an Accumulation Meter with stored Interval Energy Data.

Western Power will perform the Metering Service in accordance with the Service Standards defined in Schedule 4.

This Metering Service requires a Miscellaneous Service Order in accordance with the Communication Rules.

⁶ This is Reference Number M16 in Table E.1.1 of Appendix E of the AA4 Access Arrangement.

Schedule 3 – Metering Services Descriptions

Contents

1. All Metering Services	32
2. Reference Services (Metering)	33
2.1. Scheduled Energy Data provision (MS-1)	34
2.2. Meter installation and energisation (MS-2)	37
3. Accessory Metering Services – Reference Service (Metering)	38
3.1. Standing Data provision (MS-3)	39
3.2. Historical Energy Data provision (MS-4)	40
3.3. Metering Installation repair (MS-5)	41
3.4. Meter upgrade/replace (not User requested) (MS-6)	42
4. Extended Metering Services	43
4.1. De-energise (Manual) (MS-7)	44
4.2. Re-energise (Manual) (MS-8)	45
4.3. Meter Exchange (MS-9)	46
4.4. Meter Investigation (MS-10)	47
4.5. Communications link installation (MS-11)	48
4.6. Communications link deactivation (MS-12)	49
4.7. Meter test (laboratory) (MS-13)	50
4.8. Meter test (on-site) (MS-14)	51
4.9. Meter reconfiguration (MS-15)	52
4.10. Enablement of Signal Pulse Outputs (MS-16)	54
4.11. Remove Meter (MS-17)	55
4.12. Verify Meter Energy Data (MS-18)	56
4.13. Non-Scheduled Special Meter Reading (MS-19)	57

1. All Metering Services

This Schedule should be read in conjunction with the Code, Electricity Industry (Customer Transfer) Code 2016 (WA), Code of Conduct for Supply of Electricity to Small Use Customers 2018(WA), Western Power's Metrology Procedure and Communication Rules (which incorporate the Build Pack).

The Build Pack, which defines detailed B2B processes and technical requirements, includes the following documents relevant to this Schedule WA B2B Electricity B2B Processes: Participant Build Pack, Usage Guidelines, Customer Transfer and Standing Data Procedure, WA B2B Procedures: Meter Data Process, WA B2B Procedures: Customer and Site Details Process, WA B2B Procedures: Service Order Process, WA B2B Procedures: Technical Guidelines, WA B2B Procedures: Technical Delivery Specification, WA aseXML Schema, Streetlights Data CSV File Specification, Unmetered Supply Data CSV File Specification, Market Roles, List of Codes, Key to Codes and Glossary.

Metering Services under this Schedule will only be provided in association with Meters owned by Western Power.

Where Eligibility Criteria are stated, Metering Services under this Schedule will only be provided when those criteria are met and continue to be met.

2. Reference Services (Metering)

The Reference Service (Metering) (standard metering services) comprises the default metering service applicable as a component of a reference service (exit service, entry service or bi-directional service). This default Metering Service includes the following Standard Metering Services:

- (a) Scheduled Energy Data provision (MS-1); and
- (b) Meter installation and energisation (MS-2).

The Additional Reference Service (Metering) comprises a scheduled Energy Data provision Metering Service which is selected by the User as permitted as an alternative to the default scheduled Energy Data provision Metering Service.

The description of each scheduled Energy Data provision Metering Service is set out in Table 2 of Schedule 2.

The process for the provision of the Scheduled Energy Data is the same for both the Reference Service (Metering) (standard metering service) and the Additional Reference Service (Metering).

This section sets out the processes for these Metering Services.

2.1. Scheduled Energy Data provision (MS-1)

Category	Standard Metering Service and Additional Metering Service
No.	MS-1
Service Description	Scheduled Energy Data provision

Energy Data will be provided to the User in accordance with the Code and the service description in table 2.

When a Metering Point is established, Western Power will assign a Reading Day Number to a Meter in the Meter Reading Schedule.

Western Power will publish a Meter Reading Schedule, for the following calendar year by 31 October each year. New Meters will be added to the Meter Reading Schedule, during the year as new Metering Points are established. Western Power may amend the Meter Reading Schedule during the year for Meter Reading optimisation, following consultation with the User. Where amended, Western Power will publish an amended Meter Reading Schedule.

Where a Connection Point has more than one Meter, Western Power will assign the same Reading Day Number to all Meters at that Connection Point, unless otherwise agreed between Western Power and the User.

Western Power will Read Meters in accordance with the Meter Reading Schedule and Energy Data will be provided to the User and the Market Operator in accordance with the Service Standard.

Western Power, acting as a Reasonable and Prudent Person, may assign a Meter to be a Customer Self-Read Meter, where a Metering Point is geographically remote; where site access to the Meter is subject to restriction; or at the request of a Customer or User.

Substitution, estimation and validation will be carried out by Western Power in accordance with the Metrology Procedure.

Eligibility Criteria:

The eligibility criteria for each Scheduled Energy Data provision Metering Service (M1 – M15) is identified with a tick (✓) in Table 4 below:

Table 4: Eligibility criteria for Schedule Energy Data provision Metering Services

Eligibility Criteria	Scheduled Energy Data provision Metering Services														
	M1	M2	M3	M4	M5	M6	M7	M8	M9	M10	M11	M12	M13	M14	M15
The User receives a compatible Network access service at the Connection Point.	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓

Eligibility Criteria	Scheduled Energy Data provision Metering Services

Energy Data for the time bands for the underlying Network access service.															
The Meter is configured with registers to measure and record Interval Energy Data for the underlying Network access service (if applicable).			✓	✓	✓	✓	✓			✓	✓	✓	✓	✓	
The Meter is connected to a communications network supported by Western Power.					✓	✓	✓					✓	✓	✓	

2.2. Meter installation and energisation (MS-2)

Category	Standard Metering Service
No.	MS-2
Service Description	Meter installation and energisation

This Metering Service may be requested by the User to establish and Energise a Meter at a Metering Point.

Where this Metering Service is requested, Western Power will:

- (a) install a new Meter at the Metering Point; and
- (b) Energise the Meter.

For Reference Services (Metering) where the default scheduled Energy Data provision Metering Service requires the provision of:

- (a) Accumulated Energy Data, Western Power will install an Accumulation Meter; and
- (b) Interval Energy Data, Western Power will install an Interval Meter.

An Accumulation Meter includes a Meter with Interval Energy Data storage capability which is declared to be an Accumulation Meter under clause 3.2(2) of the Metering Code.

For:

- (a) an exit service or entry service the Meter will be configured to measure the transfer of electricity out of or into (respectively) the Network, but not both; and
- (b) a bi-directional service the Meter will be configured to measure the transfer of electricity into and out of the Network.

This Metering Service description should be read in conjunction with the Code and the Communication Rules, which incorporate the Build Pack. The Build Pack, including the WA B2B Procedures: Service Order Process, defines specific detail as to the business processes and B2B transactions associated with the provision of this Service. **Eligibility Criteria**

A New Connection Service Order in accordance with the Communication Rules.

- A valid notice from the Customer's Electrical Contractor, confirming that the Metering Point is ready for a Meter to be installed and Energised.

3. Accessory Metering Services – Reference Service (Metering)

Certain Metering Services requested by a User and which Western Power provides under this Agreement are an accessory to a Reference Service (Metering).

Accessory Metering Services - Reference Services (Metering) are not a component of a Reference Service. They are provided in accordance with the Code, as identified by Western Power or in response to a specific request under this Agreement.

However, the costs of Accessory Metering Services - Reference Services (Metering) are recovered in Reference Tariffs.

Accessory Metering Services - Reference Services (Metering) are:

- (a) Standing Data provision (MS-3); and
- (b) Historical Energy Data provision (MS-4); and
- (c) Metering Installation repairs (MS-5); and
- (d) Meter upgrade/replace (not User requested) (MS-6).

This section describes these Accessory Metering Services - Reference Services (Metering).

3.1. Standing Data provision (MS-3)

Category	Accessory Metering Service – Reference Services (Metering)
No.	MS-3
Service Description	Standing Data provision

Standing Data will be provided to the User in accordance with the Code, including:

- (a) the provision of Standing Data upon registration of a Metering Point; and
- (b) following changes to items⁷ of Standing Data.

This Metering Service may be requested by the User in accordance with the Customer Transfer Code.

Eligibility Criteria:

- Provided by Western Power in accordance with the Code and Customer Transfer Code; or
- NMI Discovery Request or NMI Standing Data Request in accordance with the Communication Rules.

⁷ Standing Data items are defined in the Code and the Communication Rules contain the complete set of Standing Data attributes.

3.2. Historical Energy Data provision (MS-4)

Category	Accessory Metering Service – Reference Services (Metering)
No.	MS-4
Service Description	Historical Energy Data provision

This Metering Service may be requested by the User in accordance with the Customer Transfer Code, to obtain up to 24 months of historical Energy Data.

Where this Metering Service is requested, Western Power will provide the requesting User with historical Energy Data for the requested period, in accordance with the Service Standard.

Eligibility Criteria:

- Provide Meter Data Service Order in accordance with the Communication Rules.

3.3. Metering Installation repair (MS-5)

Category	Accessory Metering Service – Reference Services (Metering)
No.	MS-5
Service Description	Metering Installation repair

This Metering Service will be performed by Western Power following completion of a test, audit or investigation confirming an outage or malfunction to a Metering Installation has occurred⁸; or upon notification⁹ of an outage or malfunction to a Metering Installation by a User or Customer.

If a test or audit confirms an outage or malfunction to a Metering Installation has occurred, Western Power will repair the Metering Installation, advise the affected parties, restore the accuracy of the Metering Installation and may make corrections to Energy Data in accordance with the Code.

Western Power, at its discretion, may replace devices associated with the Metering Installation (i.e. the Meter) instead of repairing the Metering Installation.

If it is decided to replace a Meter rather than repair the Metering Installation, the associated Service Order will be closed and a replacement will be subject to the terms defined for the Meter upgrade Service (MS-6).

Eligibility Criteria:

- This Metering Service is provided in accordance with the Code.

⁸ The Meter investigation Metering Service (MS-10) should be used to request investigation of a User concern, or concern raised with the User by a Customer, relating to a Metering Installation.

The Meter test Metering Services (MS-13 or MS-14) should be used to request a test or audit of the accuracy of a Metering Installation. The verify Meter Energy Data Metering Service (MS-18) should be used to request an audit of Energy Data for a Metering Installation.

⁹ For the avoidance of doubt, notification of an outage or malfunction to a Metering Installation does not replace the Meter investigation Service (MS-10), the Meter test Metering Service (MS-13 or MS-14) or the verify Meter data Service (MS-18).

3.4. Meter upgrade/replace (not User requested) (MS-6)

Category	Accessory Metering Service – Reference Services (Metering)
No.	MS-6
Service Description	Meter upgrade/replace (not User requested)

This Metering Service will be performed by Western Power, where a Meter requires replacement or upgrade to align with the requirements of the Metering Code, or at Western Power’s discretion to satisfy a Network operator requirement.

Eligibility Criteria:

- This Service is provided in accordance with the Code.

4. Extended Metering Services

Extended Metering Services are Metering Services a User requests and Western Power provides under this Agreement.

Extended Metering Services are not a component of Reference Services. They are provided in response to a specific request under this Agreement.

Extended Metering Services are not cyclic and are referred to as 'off cycle'.

The costs of Extended Metering Services are not recovered in Reference Tariffs and a payment is made under this Agreement. These payments are detailed in Schedule 5.

The Extended Metering Services are:

- (a) De-energise (manual) (MS-7);
- (b) Re-energise (manual) (MS-8);
- (c) Meter exchange (MS-9);
- (d) Meter investigation (MS-10);
- (e) Communications link installation (MS-11);
- (f) Communications link deactivation (MS-12);
- (g) Meter test (laboratory) (MS-13);
- (h) Meter test (on-site) (MS-14);
- (i) Meter reconfiguration (MS-15);
- (j) Enablement of signal pulse outputs (MS-16);
- (k) Remove Meter (MS-17);
- (l) Verify Meter Energy Data (MS-18); and
- (m) Non-scheduled special Meter Reading (MS-19).

This section describes these Extended Metering Services.

4.1. De-energise (Manual) (MS-7)

Category	Extended Metering Service
No.	MS-7
Service Description	De-energise (Manual)

This Metering Service is an Extended Metering Service for use where a site visit is required.

This Metering Service may be requested by the User to De-energise electricity supply to a Metering Point.

Where this Metering Service is requested, Western Power will De-energise the Metering Point.

This Metering Service will only be performed by Western Power on the following days and times:

- (a) Monday to Thursday¹⁰ (excluding public holidays); and
- (b) between 7:30am and 2:00pm (WST).

This Metering Service will not be performed by Western Power on the Business Day before a public holiday.

Fees and Service Standards for this Metering Service are defined in Schedule 4 and 5, as applicable to the User's requirements.

Due to the complex and variable requirements associated with High Voltage Metering Points, High Voltage De-energise Metering Services will be priced on application in accordance with the quotation methodology defined in Schedule 5.

Eligibility Criteria:

- A De-energise Service Order in accordance with the Communication Rules.

¹⁰ Friday is deemed a Non-Business Day for this Metering Service.

4.2. Re-energise (Manual) (MS-8)

Category	Extended Metering Service
No.	MS-8
Service Description	Re-Energise (Manual)

This Metering Service is an Extended Metering Service for use where a site visit is required.

This Metering Service may be requested by the User to Re-energise electricity supply to a Customer.

Where this Metering Service is requested, Western Power will Re-energise the Metering Point.

The User may request that a Re-energise Metering Service be performed as an Urgent Re-energise Service where prioritisation of a Re-energise Service is required.

Fees and Service Standards for this Metering Service are defined in Schedule 4 and 5, as applicable to the User's requirements.

Due to the complex and variable requirements associated with High Voltage Metering Points, High Voltage Re-energise Metering Services will be priced on application in accordance with the quotation methodology defined in Schedule 5.

Eligibility Criteria:

- A Re-energise Service Order in accordance with the Communication Rules.

4.3. Meter Exchange (MS-9)

Category	Extended Metering Service
No.	MS-9
Service Description	Meter Exchange

This Metering Service is an Extended Metering Service¹¹.

This Metering Service may be requested by the User to replace a Meter at a Metering Point , to satisfy the eligibility criteria for accessing a Reference Service (Metering).

Where this Metering Service is requested, Western Power will:

- (a) attend the Metering Point; and
- (b) exchange the existing Meter.

Where this Metering Service is provided to satisfy the eligibility criteria for a Reference Service (Metering) that includes the scheduled provision of:

- (a) Accumulated Energy Data, Western Power will install an Accumulation Meter;
- (b) Interval Energy Data, Western Power will install an Interval Meter.

For:

- (a) an exit service or entry service the Meter will be configured to measure the transfer of electricity out of or in to (respectively) the Network, but not both; and
- (b) a bi-directional service the Meter will be configured to measure the transfer of electricity in to and out of the Network.

An Accumulation Meter includes a Meter with Interval Energy Data storage capability which is declared to be an Accumulation Meter under clause 3.2(2) of the Metering Code.

Where requesting this Metering Service to satisfy the eligibility criteria for a Reference Service (Metering) that includes the provision of scheduled Energy Data provision via remote reading, the User must also request a communications link installation Service (MS-11).

Eligibility Criteria:

- An Additions & Alterations – Exchange Meter Service Order or Miscellaneous Service Order in accordance with the Communication Rules.

¹¹ Where a Meter requires replacement or upgrade in response to an actual or projected increase in Meter Throughput or in association with asset maintenance, it will be performed by Western Power as a Standard Metering Service, under the Meter upgrade Metering Service. Western Power may request evidence be provided by the User to support the projected increase in Meter Throughput.

4.4. Meter Investigation (MS-10)

Category	Extended Metering Service
No.	MS-10
Service Description	Meter Investigation

This Metering Service is an Extended Metering Service.

This Metering Service may be requested by the User to:

- (a) audit a Metering Installation due to a User concern, or concern raised by a Customer¹², other than issues relating to the accuracy of a Meter¹³; or
- (b) audit the Standing Data for a Metering Installation.

Where this Metering Service is requested, Western Power will investigate the concern raised by the requestor and subsequently report the outcome of this investigation to the User.

Where an outage or malfunction to a Metering Installation is confirmed, Western Power will complete a Metering Installation repair (MS-5), subject to the discretion noted in that Metering Service description to replace the Meter instead.

The Meter test Metering Services (MS-13 or MS-14) should be used to request a test or audit of the accuracy of a Metering Installation.

The verify Meter Energy Data Service (MS-18) should be used to request an audit of Energy Data for a Metering Installation.

Eligibility Criteria:

- A Meter Investigation - Inspect Service Order in accordance with the Communication Rules.

¹² For example, crossed Meters, Meter irregularities, confirmation of Metering Points, tampering and general investigation.

¹³ For investigation relating to the accuracy of a Meter the Meter test Metering Service (MS-13 or MS-14) should be requested.

4.5. Communications link installation (MS-11)

Category	Extended Metering Service
No.	MS-11
Service Description	Communications link installation

This Metering Service is an Extended Metering Service.

This Metering Service may be requested by the User to install and activate a communications link, to satisfy the eligibility criteria for accessing a Reference Service (Metering).

Where requesting this Metering Service for a Meter that cannot accommodate a communications link, the User must also request a Meter exchange Service (MS-9).

Eligibility Criteria:

- A Miscellaneous Service Order in accordance with the Communication Rules.
- The Meter is a model and configuration suitable for the Metering Service being requested.
- A communications network supported by Western Power is available at the Meter location

4.6. Communications link deactivation (MS-12)

Category	Extended Metering Service
No.	MS-12
Service Description	Communications link deactivation

This Metering Service is an Extended Metering Service.

This Metering Service may be requested by the User to deactivate a communications link.

The User cannot request this Metering Service for a Meter that must incorporate a communications link, under the Code.

Eligibility Criteria:

- A Miscellaneous Service Order in accordance with the Communication Rules.
- A communications link is not required for the Meter under the Code.

4.7. Meter test (laboratory) (MS-13)

Category	Extended Metering Service
No.	MS-13
Service Description	Meter test (laboratory)

This Metering Service is an Extended Metering Service.

The Metering Service may be requested by the User to test or audit the accuracy of a Metering Installation.

Testing will be carried out in a National Association of Testing Authorities (NATA) accredited laboratory under various load conditions, using reference standards that are traceable to national standards. Performance characteristics are monitored, such as 'running at no-load' (creep) and 'operation of register or display', for correct operation.

A report will be issued to the User on the finding of the tests. In addition, a weighted average of the overall accuracy of the Meter will be calculated and provided to the User.

Where an outage or malfunction to a Metering Installation is confirmed, Western Power will complete a Metering Installation repair (MS-5), subject to the discretion noted in that Metering Service description to replace the Meter instead.

Eligibility Criteria:

- A Meter Investigation – Meter Test Service Order in accordance with the Communication Rules.

4.8. Meter test (on-site) (MS-14)

Category	Extended Metering Service
No.	MS-14
Service Description	Meter test (on-site)

This Metering Service is an Extended Metering Service.

The Metering Service may be requested by the User to test or audit a Metering Installation.

Testing will be carried out at the Customer's premises under various load conditions, using instruments that are traceable to national standards. Performance characteristics are monitored, such as 'running at no-load' (creep) and 'operation of register or display', for correct operation.

A report will be issued to the User on the finding of the tests. In addition, a weighted average of the overall accuracy of the Meter will be calculated and provided to the User.

Where an outage or malfunction to a Metering Installation is confirmed, Western Power will complete a Metering Installation repair (MS-5), subject to the discretion noted in that Service description to replace the Meter instead.

Eligibility Criteria:

- A Meter Investigation – Meter Test Service Order in accordance with the Communication Rules.

4.9. Meter reconfiguration (MS-15)

Category	Extended Metering Service
No.	MS – 15
Service Description	Meter reconfiguration

This Service is an Extended Metering Service.

This Service may be requested by the User to reconfigure the data register coding details¹⁴ for a Meter, to satisfy the eligibility criteria for accessing a Reference Service (Metering). For example to accommodate the addition or removal of:

- (a) Data registers for the measurement of bi-directional flows; and/or
- (b) Data registers for the measurement of time of use.

Where this Service is requested, Western Power will:

- (a) reprogram the Meter, if required; and
- (b) reconfigure data register coding details to the configuration requested.

Where a Meter is:

- (a) configured to receive commands for this Metering Service from a remote locality; and
- (b) where communication equipment to transmit commands to the Meter from Western Power has been installed; and
- (c) the communication link is activated,

this Service will be delivered remotely and the “Remote” fee defined in Schedule 5 will apply. Where a site visit is required to perform the Service, the “Manual” fee defined in Schedule 5 will apply.

Upon completion of the Metering Service, data streams for the new configuration will be provided from the Actual Change Date.

Eligibility Criteria:

- A Reconfigure Service Order or Miscellaneous Service Order in accordance with the Communication Rules.
- The Meter is a model and configuration suitable for the Service being requested.
- The Meter and the requested data register coding configurations are consistent with the requirements of the reference service (exit service, entry service or bi-directional service) or have otherwise been agreed between Western Power and the User.

For Remote Metering Services:

- A Meter configured to receive commands for this Service from a remote locality.

¹⁴ Data register coding details are an item of Standing Data.

- Communication equipment to transmit commands to and messages from the Meter and Western Power has been installed and is activated.
- A communications network supported by Western Power is available at the Meter location.

4.10. Enablement of Signal Pulse Outputs (MS-16)

Category	Extended Metering Service
No.	MS-16
Service Description	Enablement of Signal Pulse Outputs

This Metering Service is an Extended Metering Service.

This Metering Service may be requested by the User to enable a Customer to monitor electricity flows via a signal cable connected to a Meter.

Where this Metering Service is requested, Western Power will install and activate a signal cable at the Metering Installation and provide the Customer, with technical information relating to the signal pulse outputs for the Meter. Western Power will also provide this technical information to the User, upon request.

Eligibility Criteria:

- A Miscellaneous Service Order in accordance with the Communication Rules.
- The Meter is a model and configuration suitable for the Service being requested.

4.11. Remove Meter (MS-17)

Category	Extended Metering Service
No.	MS-17
Service Description	Remove Meter

This Metering Service is an Extended Metering Service.

This Metering Service may be requested by the User to permanently remove a redundant Meter, where multiple Meters are associated with a Metering Point.

Where this Metering Service is requested, Western Power will remove the Meter from the Metering Point and reflect the removal in the Registry.

This Metering Service is not a supply abolishment Service. If a Connection Point requires permanent disconnection, the User must request the supply abolishment Service which is Reference Service D1, the description of which is in Appendix E to the Access Arrangement.

Eligibility Criteria:

- An Additions & Alterations – Remove Meter Service Order in accordance with the Communication Rules.
- There is more than one Meter associated with a Connection Point.
- At least one Meter will remain at the Metering Point upon completion of the remove Meter Service.
- Customer owned installation assets are not required to be removed or reconfigured by Western Power to complete the remove Meter Service.

4.12. Verify Meter Energy Data (MS-18)

Category	Extended Metering Service
No.	MS-18
Service Description	Verify Meter Energy Data

This Metering Service is an Extended Metering Service.

This Metering Service may be requested by the User to request the verification of Energy Data; for example if:

- (a) the User reasonably believes the meter data file format in a meter data notification is erroneous; or
- (b) the User reasonably believes an investigation is required into the validity and accuracy of the Energy Data.

Where this Service is requested, Western Power will audit the Energy Data for the Metering Installation and, where Energy Data errors are identified, provide the User with replacement Energy Data.

Western Power will not perform a site visit as part of the verification process. The User should request the Meter investigation (MS-10) or Meter test (MS-13 or MS-14) Metering Service, to audit a Metering Installation or Standing Data for a Metering Installation or to test or audit the accuracy of a Metering Installation.

Eligibility Criteria:

- A Provide Meter Data Service Order in accordance with the Communication Rules.

4.13. Non-Scheduled Special Meter Reading (MS-19)

Category	Extended Metering Service
No.	MS-19
Service Description	Non-Scheduled Special Meter Reading

This Metering Service is an Extended Metering Service.

This is an Accumulated Energy Data Service for an Accumulation Meter.

This is an Interval Energy Data Service for an Interval Meter.

This Metering Service may be requested by the User to obtain an Actual Value between scheduled Meter Reading dates in the Meter Reading Schedule.

The User may request the performance of this Metering Service on a nominated (appointment) date, subject to the lead days defined in Schedule 4. Where the User requests the Metering Service be performed on a nominated date, Western Power will perform the Metering Service on the later of the nominated date and the date required under the Service Standards defined in Schedule 4.

Where this Metering Service is requested, Western Power will provide the User with an Actual Value; substitution or estimation may be applied in accordance with the Code, following consultation with the User.

Eligibility Criteria:

- A Special Read Service Order in accordance with the Communication Rules.

Schedule 4 – Service Standards

This Schedule defines the Service Standard response times and performance measures for Metering Services in Metropolitan and Country areas.

Cyclic Metering Service

The only cyclic Metering Service is MS-1, Scheduled Energy Data provision.

This Metering Services will be performed in accordance with the Code and the Communication Rules as follows:

- (a) Meters may be Read between one Business Day ahead of; and up to two Business Days after, the scheduled Read date.
- (b) Energy Data will be provided before 5:00 pm on the #¹⁵ Business Days after obtaining (if the Energy Data passes validation).
- (c) Energy Data will be provided before 5:00 pm on the #¹⁶ Business Days after obtaining (if the Energy Data fails validation), unless Western Power and the User agree otherwise.
- (d) Energy Data will always be provided. Where an Actual Value is not available, substituted and estimated Energy Data will be provided in accordance with the Metrology Procedure.

Off-cycle Metering Services

These are:

- (a) Reference Service (Metering) (standard metering services) – MS-2, Meter installation and energisation.
- (b) Accessory Metering Services - Reference Services (Metering) –MS-3, MS-4, MS-5 and MS-6.
- (c) Additional Reference Service (Metering) – MS-20, one off manual Interval Read.
- (d) Extended Metering Services (MS-7 through MS-19)

In Metropolitan areas:

- (a) The Metering Service will be performed by the later of the requested date and #¹⁷ Business Days after acceptance of a Service Order (if the request is received before 3:00 pm on a Business Day).
- (b) The Metering Service will be performed by the later of the requested date and #¹⁸ Business Days after acceptance of a Service Order (if the request is received after 3:00 pm on a Business Day or a Non-Business Day).

¹⁵ The first number in the relevant column of the Service Standard table for the Metering Service.

¹⁶ The second number in the relevant column of the Service Standard table for the Metering Service.

¹⁷ The first number in the relevant column of the Service Standard table for the Metering Service.

¹⁸ The second number in the relevant column of the Service Standard table for the Metering Service.

In Country areas:

- (a) The Metering Services will be performed by the later of the requested date and #¹⁹ Business Days after acceptance of a Service Order (if the request is received before 3:00 pm on a Business Day).
- (b) The Metering Services will be performed by the later of the requested date and #²⁰ Business Days after acceptance of a Service Order (if the request is received after 3:00 pm on a Business Day or a Non-Business Day).

Table 5: Service Standards for Reference Service Metering

No.	Meter Service Description	Service Standard (Business Days)		KPI
		Metropolitan	Country	
Reference Services Metering				
MS – 1	Scheduled Energy Data provision	1/2	1/2	99%
MS – 2	Meter installation and energisation	1/2/A (20 ²¹)	5/6/A (20 ²²)	99%

Table 5: Service Standards for Accessory Metering Services - Reference Services (Metering)

No.	Meter Service Description	Service Standard (Business Days)		KPI
		Metropolitan	Country	
MS – 3	Standing data provision ²³	2	2	99%
MS – 4	Historical Energy Data provision	2	2	99%
MS – 5	Metering installation repair	10/11	15/16	95%
MS – 6	Meter upgrade	*	*	*

Table 5: Service Standards for 'Off-Cycle' Additional Reference Service (Metering)

No.	Meter Service Description	Service Standard (Business Days)		KPI
		Metropolitan	Country	
MS – 20	One-off manual Interval Read	10/11	15/16	95%

Table 5: Extended Metering Services Service Standards

No.	Service Description	Service Standard (Business Days unless otherwise stated)		KPI
		Metropolitan	Country	
Extended Metering Services				
MS – 7	De-energise (manual)	3/4	5/6	95%
MS – 8	Re-energise (manual)			
A	Standard	1/2	5/6	99%

¹⁹ The first number in the relevant column of the Service Standard table for the Metering Service.

²⁰ The second number in the relevant column of the Service Standard table for the Metering Service.

* In accordance with the Code.

²¹ In accordance with the *Electricity Industry (Obligation to Connect) Regulations 2005 (WA)*: Attachment or connection (Meter installation) within 20 Business Days and Energise within 1/2/A for Metropolitan areas.

²² In accordance with the *Electricity Industry (Obligation to Connect) Regulations 2005 (WA)*: Attachment or connection (Meter installation) within 20 Business Days and Energise within 5/6/A for Country areas.

A: By agreement with the Customer.

²³ This Service Standard relates to general Standing Data provision. Bulk Standing Data will be provided in accordance with the Code.

No.	Service Description	Service Standard (Business Days unless otherwise stated)		KPI
		Metropolitan	Country	
B	Urgent	3 hours	24 hours	99%
MS – 9	Meter exchange	10/11	15/16	95%
MS – 10	Meter investigation	10/11	15/16	95%
MS – 11	Communications link installation	10/11	15/16	95%
MS – 12	Communications link deactivation	10/11	15/16	95%
MS – 13	Meter test (laboratory)	15/16	20/21	95%
MS – 14	Meter test (on- site)	10/11	15/16	95%
MS – 15	Meter reconfiguration	10/11	15/16	95%
MS – 16	Enablement of signal pulse outputs	10/11	15/16	95%
MS – 17	Remove Meter	10/11	15/16	95%
MS – 18	Verify Meter Energy Data	5	5	99%
MS – 19	Non-scheduled special Meter Reading	3	5	95%

Performance Measurement

Timeliness

Performance to the Service Standard will be measured on the difference between the requested date of the Metering Service and the Actual Change Date.

Where a change does not occur, but a field visit is required, performance will be measured on the difference between the requested date of the Metering Service and the Field Completion Date.

Where a change does not occur, and a field visit is not required, performance will be measured on the difference between the requested date and the date of data provision.

Where a Metering Service requires an isolation of supply, performance on a day agreed with the Customer shall be deemed compliant to the Service Standard, including where the agreed day extends beyond the Service Standard response time.

Performance against the key performance indicator (KPI) for each Metering Service will be calculated using the following measurement methodology:

For cyclic Metering Services (MS-1):

$$\frac{\text{Volume of data provision that met the Service Standard during the reporting period}}{\text{Total volume of data provision during the reporting period}} \times \frac{100}{1}$$

For off cycle Metering Services (MS-2 to MS-20):

$$\frac{\text{Number of Metering Services that met the Service Standard during the reporting period}}{\text{Total number of Metering Services performed during the reporting period}} \times \frac{100}{1}$$

Accuracy

Table 5: Energy Data provision accuracy requirements

No.	Data Description	KPI
1	Accumulated Energy Data	95%
2	Interval Energy Data	95%

Performance against the key performance indicators (KPI) set out in Table 5 will be measured based on the ratio of Actual Values to the total number of Energy Data values (i.e. inclusive of estimated and substituted values) published during a reporting period:

$$\left(\frac{\text{Number of Actual Values published}}{\text{Total number of values published during the reporting period}} \times \frac{100}{1} \right)$$

Performance will be reported to the User via a monthly key performance indicator report.

Timing Requirements

For Metering Services that do not require a Service Order, timing requirements are defined in the Code.

For Metering Services requiring a Service Order, each stage of the Service Order process must be performed with the prescribed timing requirements²⁴.

- (a) Figure 1 illustrates the timing requirements for the Service Order process.
- (b) Figure 2 defines the timing points and periods.
- (c) Figure 3 defines the use of timing periods.

Acceptance or rejection of a Service Order request must be performed by Western Power the same Business Day as receipt of the Service Order request.

A Service Order response must be issued by Western Power within 2 Business Days of the performance of the requested work.

²⁴ See Figures 1, 2 & 3 for further detail.

Figure 1: Timing Requirements

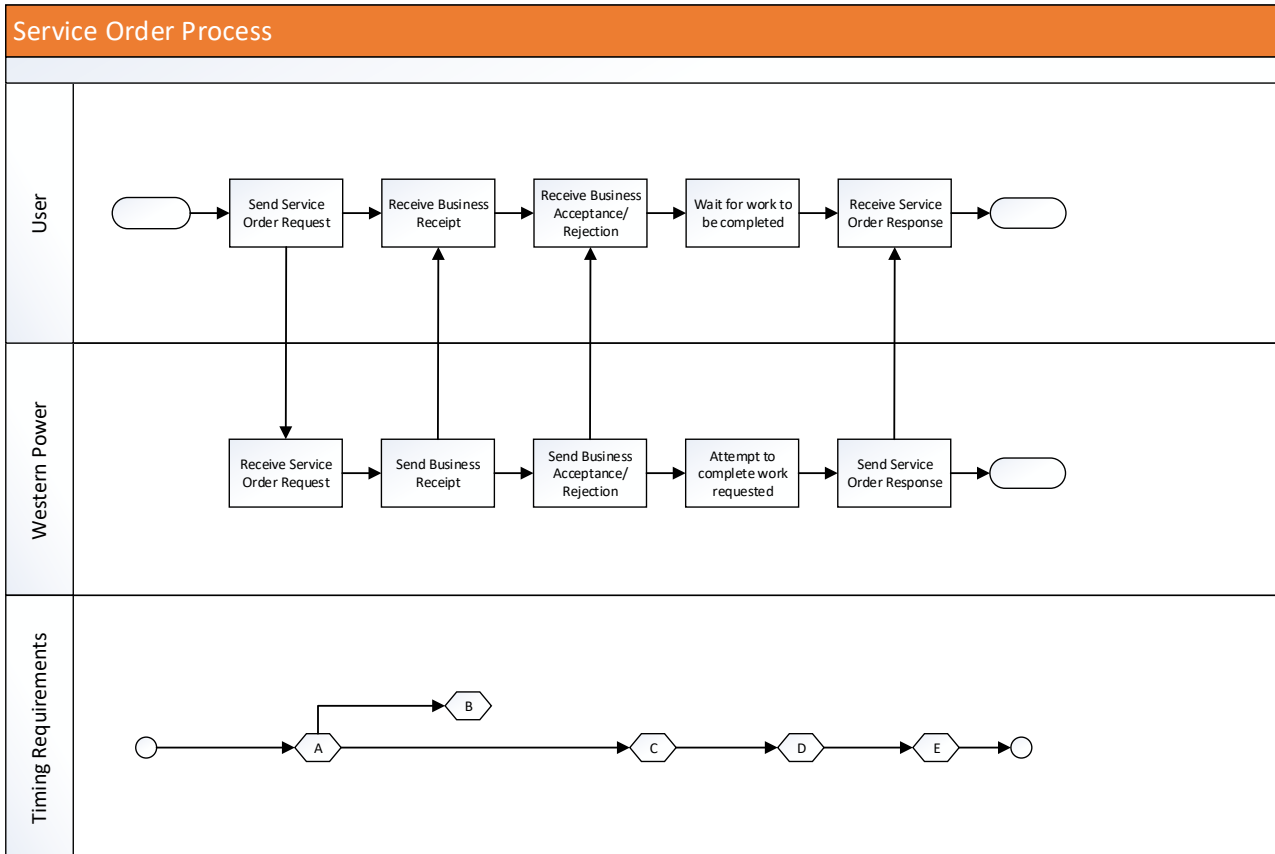

Figure 2: Timing Points

Timing Point	Definition
A	This timing point is when the User issues a Service Order request to Western Power.
B	This timing point is when the User receives a business receipt for a Service Order request from Western Power.
C	This timing point is when the User receives a business acceptance or rejection for a Service Order request from Western Power.
D	This timing point is when the work requested has been performed, or performance has been attempted. It is also referred to as the Actual Change Date or the Field Completion Date.
E	This timing point is when Western Power sends a Service Order response following the performance of work requested, or the attempted performance.

Figure 3: Use of timing periods

Timing Period	Definition	Usage
Initiation period	This is the period from the User's identification of the need for a Service to the sending of a Service Order request to Western Power. Timing Point A is the end of this period.	To be monitored by the User.

Timing Period	Definition	Usage
Receipt of Service Order request	This is the period from sending of the Service Order request by the User to receipt of the request by Western Power. Timing Points A and B define this period.	Used by the User to determine whether a Service Order request has been received and can be Read.
Acceptance or rejection of Service Order requests	This is the period from the sending of the Service Order request by the User to the acceptance or rejection of the request by Western Power. Timing Points A and C define this period.	Used by the User to determine whether a Service Order request has been accepted.
Completion of requested work	This is the period from the later of the acceptance date and the requested date and performance of the requested work (or attempted performance) by Western Power. Timing Points C and D define this period.	Used by the User and Western Power to monitor Service delivery performance.
Issuing a Service Order response	This is the period from the performance of the requested work (or attempted performance) by Western Power (the Actual Change Date or Field Completion Date) and the sending of a Service Order response to the User. Timing Points D and E define this period.	Used to advise the User of performance of the Service.

Schedule 5 – Fees

This Schedule defines the Fees payable by the User for Extended Metering Services and Additional Metering Services for the 2019/20 financial year. Fees will be adjusted for the financial years occurring after 2019/20.

The Metering Services provided under this Agreement by Western Power are individually priced.

Reference Tariffs for Reference Services (Metering) (standard metering services) are set out in the Price List.

Under the heading Additional Metering Services in Table 5, the fees payable (Reference Tariff) pursuant to the authority of the Price List²⁵ where the User has selected an Additional Reference Service (Metering). As required by the Price List, these Fees reflect the incremental cost of providing the Metering Service. This fee is to be regarded as having been specified in the Price List.

All Fees set out in this Schedule are:

- (a) effective for the period 1 July 2019 to 30 June 2020;
- (b) exclusive of GST; and
- (c) will be WPI-Adjusted on an annual basis from 1 July 2020.

Table 5: Metering Services Fees

ID	Service Description	Fee (\$ per unit unless otherwise stated)	
		Metro	Country
Standard Metering Services			
MS-1	Scheduled Energy Data provision		
A	As a component of a Reference Service Metering) (standard metering service)		26
MS-2	Meter installation and energisation		27
Additional Metering Services			
MS-1	Scheduled Energy Data provision (as a component of an Additional Reference Service (Metering)		
B	Interval, bi-monthly, manual	\$0.229 per day ²⁸	
C	Interval, monthly, manual	\$0.458 per day ²⁹	
D	Interval, bi-monthly, remote	\$0.122 per day ³⁰	
E	Interval, monthly, remote	\$0.122 per day ³¹	
F	Interval, daily, remote	\$1.060 per day	
Accessory Metering Services - Reference Services (Metering)			
MS-3	Standing data provision		32

²⁵ See footnote 2, page 37 of the 2019/20 Price List. See also sections 1.2.2 and 7.1.6 of the Price List Information for 2019/20.

²⁶ The fee for this service forms part of the reference tariff.

²⁷ The fee for this service forms part of the reference tariff.

²⁸ The fee for this service forms part of the reference tariff.

²⁹ The fee for this service forms part of the reference tariff.

³⁰ The fee for this service forms part of the reference tariff.

³¹ The fee for this service forms part of the reference tariff.

³² The fee for this service forms part of the reference tariff.

ID	Service Description	Fee (\$ per unit unless otherwise stated)	
		Metro	Country
MS-4	Historical Energy Data provision	33	
MS-5	Metering installation repair	34	
MS-6	Meter upgrade/replace (not User requested)	35	
Extended Metering Services			
MS-7	De-energise (Manual)		
A	Low Voltage supply	53.19	116.61
B	High Voltage supply	POA	POA
MS-8	Re-energise (Manual)		
A	Standard – Low Voltage supply	53.19	116.61
B	Urgent – Low Voltage supply	147.83	215.68
C	High Voltage Supply	POA	POA
MS-9	Meter exchange		
A	Single phase whole current meter	64.55	137.05
B	Three phase whole current meter	64.55	137.05
C	Current transformer meter	64.55	137.05
MS-10	Meter investigation	178.01	257.46
MS-11	Communications link installation		
A	Radio frequency communications link	64.55	137.05
B	Cellular communications link	324.34	396.84
MS-12	Communications link deactivation	64.55	137.05
MS-13	Meter test (laboratory)		
A	Single phase whole current meter	453.01	559.73
B	Three phase whole current meter	563.43	681.19
MS-14	Meter test (on- site)		
A	Single phase whole current meter	340.31	435.99
B	Three phase whole current meter	465.43	572.15
C	Current transformer meter	549.97	662.22
MS-15	Meter reconfiguration		
A	Manual	64.55	137.05
B	Remote	20.02	20.02
MS-16	Enablement of signal pulse outputs	307.50	397.67
MS-17	Remove Meter	127.91	204.27
MS-18	Verify Meter Energy Data	6.51	6.51
MS-19	Non-scheduled special Meter Reading		
A	Accumulation Meter (Manual)	9.87	32.16
B	Interval Meter (Manual)	13.66	40.91

³³ The fee for this service forms part of the reference tariff.

³⁴ The fee for this service forms part of the reference tariff.

³⁵ The fee for this service forms part of the reference tariff.

ID	Service Description	Fee (\$ per unit unless otherwise stated)	
		Metro	Country
C	Interval Meter (Remote)	0.60	0.60
MS-20	One off manual Interval Read	17.66	44.91

Western Power will waive, or refund or offset as appropriate, the Fee for any Metering Service that is shown to have been incurred due to erroneous information supplied by Western Power.

Cancellation Fees

The Fees in Table 5 apply to Metering Services cancelled following receipt of a Service Order by Western Power.

Table 5: Cancellation Fees

ID	Service Description	Fee (\$ per unit)
Cancellation of Service Order		
C – 1	B2B ³⁶	0.60
C – 2	In Field ³⁷	75% of Relevant Metering Service Fee
C – 3	Customer Prevented	100% of Relevant Metering Service Fee

Fees for Services Priced on Application

Unless otherwise agreed by Western Power and the User, Fees for Metering Services that are Priced on Application (identified as 'POA'), will be calculated by Western Power in accordance with the following methodology defined in Table 12 or Table 5, as relevant.

Calculation of unit rates

Unit rates will be calculated as follows:

- (a) Where 100% cost allocation is required per unit:

Table 5: Unit rate methodology A

Direct	Indirect	Unit Rate
$\begin{aligned} & ((\text{field labour rate}) + (\text{labour support rate}) \\ & \quad \times (\text{field labour hours}) \\ & \quad + \\ & \quad (\text{fleet rate}) \times (\text{fleet hours}) \\ & \quad + \\ & ((\text{admin labour rate}) + \text{labour support} \\ & \quad \text{rate})) \times (\text{admin labour hours}) \\ & \quad + \\ & \quad \text{Materials} \end{aligned}$	Other Indirect Cost Allocation (ICA) rate	Direct cost + Indirect cost

- (b) Where partial cost allocation³⁸ is required per unit:

Table 5: Unit rate methodology B

Direct	Indirect	Unit Rate
$\begin{aligned} & (\text{admin labour rate}) + (\text{labour support rate}) \\ & \quad \times \\ & \quad (\text{admin labour hours}) \end{aligned}$	Other Indirect Cost Allocation (ICA) rate	$\begin{aligned} & (\text{Direct} + \text{Indirect}) \\ & \quad \times \\ & \quad \text{Exception rate} \end{aligned}$

³⁶ Following acceptance of a Service Order by Western Power but prior to allocation of the Service Order to a delivery resource.

³⁷ Following acceptance of a Service Order by Western Power which Western Power has allocated to a delivery resource.

³⁸ To recover the cost of administrative oversight of processes which are largely automated.

Calculation of field and administration labour rates

Western Power will use a weighted average labour cost, based on resource type for the calculation of payroll and contractor rates.

Field and administration labour rates will be calculated as follows:

$$\$/hr = \frac{\text{Weighted average base salary or rate} + \text{Labour on costs}^{39}}{\text{Annual available working hours}^{41}} + \text{Labour support rate}^{40}$$

Calculation of fleet rates

Western Power will use a unit rate equal, or equivalent to, the total amount incurred for the hire of a unit of fleet equipment under a hire arrangement.

The Fee calculated will be based on application of the unit rate to the hours the equipment is expected to be utilized to perform the Service.

Calculation of materials rates

Western Power will use a unit rate equal the total amount incurred for procurement of materials associated with provision of a Service.

The Fee calculated will be based on application of the materials rate to the quantity of materials required to provide the Service.

Calculation of other indirect costs

Western Power will use an Indirect Cost Allocation (ICA) as follows

$$\% = \frac{\text{Other indirect costs - Recovery through labour hours allocations}}{\text{Indirect base}}$$

Calculation of exception rates

Western Power will use an exception rate calculation methodology as follows:

$$\% = \frac{\text{Level of activity requiring non-automated processing}}{\text{Total level of activity}}$$

³⁹ For allocation of allowances such as payroll tax, superannuation, workers compensation, long service leave provision.

⁴⁰ To recover the costs of direct labour resource management and support.

⁴¹ Based on consideration of normal time, annual leave, sick leave, public holidays and utilisation rate.
