Review of Western Power's Model Service Level Agreement

Time extended for publication of draft findings

On 10 June 2019, the Economic Regulation Authority published Western Power's [updated model service level agreement](#) that reflects the approved network [access arrangement](#). Public consultation on the amendments is currently scheduled to close on 28 June 2019.

Western Power's updated model service level agreement was submitted to the ERA later than originally anticipated as it was necessary to incorporate the changes to metering services in the approved network access arrangement. In response to a stakeholder request, the ERA has extended the deadline for the public consultation to Friday 5 July 2019.

In order to properly consider Western Power's amendments and public submissions, the ERA has extended the deadline to publish draft findings to Friday, 30 August 2019.

This extension is made under section 6.13(2) of the *Electricity Industry (Metering) Code 2012*.
