Thank you for considering my submission Regarding water meter access.

I had hoped that the ERAWA may have considered third parties or a separate entity having the ability to issue infringement notices/fines to Water Corp.

**Comments:**

Left to do as they please , Water Corp act as if they are above the law. They install meters in breach of regulations. They sell equipment to enable owners to break the law.

They then threaten, bully, bribe and coerce others to cover for the breaches of regulations.

Prior to this consultation I has spoken to the Corruption and Crime Commission and it has just been a matter of putting something in writing for them to consider the issues.

Reading further that the Department and ERWA both are trying to avoid regulating suggests that they have successfully captured their regulators and is another issue to consider.
