Western Power's technical rules

Updated list of exemptions

Western Power has provided the Economic Regulation Authority with an updated list of exemptions to its technical rules. The updated list includes exemptions granted from 30 June 2019 to 31 December 2019.

Western Power's technical rules set out the standard requirements for customer connection. Under certain circumstances, Western Power may exempt a customer from complying with one or more requirements of the rules.

When an exemption is made, Western Power is required to notify the ERA under section 12.38 of the *Electricity Networks Access Code 2004*. The ERA then notifies the public. Western Power's list of exemptions is available on the [ERA website](#).
