4.1.3 In the above table the meaning of the term “average recurrence interval” shall be consistent with the discussion on probability concepts for flood estimation and rainfall intensity – frequency – duration estimation, as contained in Books 1 & 2 respectively of the Institution of Engineers Australia publication, Australian Rainfall and Runoff (1987).

4.1.4 In planning and designing urban infrastructure, the *licensee* must have due regard to the principles, concepts and recommendations of Australian Rainfall and Runoff (1987).

4.1.5 If, prior to 1 January 1996, the *licensee* constructed drainage infrastructure to levels of service standards which were less than those specified in this *Schedule* then there will be no obligation under this *licence* for the *licensee* to upgrade any infrastructure existing as at 1 January 1996, to meet the above standards where there have been no instances of flooding confirmed to be due to the under capacity of the infrastructure to meet those standards. Where there have been instances of flooding confirmed to be due to under capacity of infrastructure to meet the standards of this *Schedule*, the *licensee* must upgrade the infrastructure to those standards or must take such action as agreed with affected *customers*.

- 4.1.6 The drainage system will accept drainage water from Local Government works, but will not be required under this *licence* to be upgraded to accept any additional drainage water.
- 4.1.7 Notwithstanding that the *licensee's* urban drainage infrastructure shall itself be designed to the capacity standards listed in this *Schedule*, in planning and designing such infrastructure the *licensee* must have due regard to the major/minor concept of drainage design discussed in Book 8, 1.5.1 of Australian Rainfall and Runoff (1987). Such due regard will be adequately demonstrated:
- (a) in the case of it undertaking, commissioning or accepting a design for new drainage infrastructure, by the *licensee* ensuring that the local authorities involved have been made aware of the predicted response of the combined major/minor system to major storm events, for the information of those authorities in relation to their responsibilities for the establishment and management of the major (as described in Australian Rainfall and Runoff (1987)) elements of the major/minor system infrastructure; and
  - (b) in the case of it undertaking a capacity review of an existing *licensee* drainage scheme, by the *licensee* causing a broad assessment to be made of the behaviour of the combined major/minor system under major event conditions, and conveying the conclusions of such assessment to the local authorities involved, for the information of those authorities in relation to their responsibilities for management of the major (as described in Australian Rainfall and Runoff (1987)) elements of the major/minor system infrastructure.
- 4.1.8 The *licensee* will ensure all new rural drainage infrastructure complies with the Rural Drainage Manual of Standards 1977. The *licensee* shall endeavour to operate and maintain its rural drainage infrastructure so that the period of inundation to land abutting a drain that forms part of the system shall be a maximum of 72 hours. If the period of inundation should exceed 72 hours the *licensee* must carry out an investigation of the adequacy of those operations and maintenance procedures. An exception is those low lying land areas where the contours make this impossible or where detention basins have been constructed for the retention of water for longer periods. Low lying areas include those areas within lots which abut the drain, which would normally not readily drain to the drain. However, land that would normally drain to the drain, but where this is prevented by high flow levels in the drain, will be subject to the maximum 72 hour inundation period. This inundation period shall apply provided multiple storm events do not increase flow levels in the drains above the rural drainage infrastructure discharge points. The drainage system serves the general drainage requirements of rural properties in the Drainage Services Control Areas and there will be no obligation under this *licence* for the *licensee* to extend the service to other properties, "or serve urban drainage development within the rural areas."
- 4.1.9 The following flood protection works will be operated and maintained to cater for the peak flows of stormwater runoff from individual rainfall events set out below.

Flood protection works	Location	Level of protection (average recurrence interval)
Preston River levees	Bunbury – Leschenault Inlet to Picton Bridge	1 in 100 year

Flood protection works	Location	Level of protection (average recurrence interval)
Vasse River Diversion	Busselton	1 in 20 year

## 5. IRRIGATION

### 5.1 Irrigation service standards

- 5.1.1 The *licensee* must supply water that is suitable for irrigation purposes.
- 5.1.2 The *licensee* must provide at least 5 *business days*' notice to a *customer* of any planned service interruption.
- 5.1.3 The *licensee* must comply with the standards as set out below.

#### Irrigation service standards

Irrigation Water Quality	Percentage of customers given 5 days' notice of a planned interruption
<1,200mg/L TDS	>90

## Schedule 3 – Customer provisions

### 1. ADDITIONAL CUSTOMER PROVISIONS

#### 1.1 Requirement for approved financial hardship policy

1.1.1 If the *licensee* at any time during the term of the *licence*:

- (a) intends to supply *water supply services* (but only in respect of the supply of *drinking water*) or *sewerage services* to *residential customers*; and
- (b) does not have a *financial hardship policy* approved by the *ERA*,

the *licensee* must submit a draft *financial hardship policy* to the *ERA* for approval.

1.1.2 The *licensee* must not commence the supply of *water supply services* (but in respect of the supply of *drinking water* only) or *sewerage services* to *residential customers* unless the *ERA* has approved the *licensee's* draft *financial hardship policy*.

1.1.3 For the purposes of clause 1.1 of this *Schedule*, 'drinking water' has the meaning given to that term in clause 4(1) of the *Code of Conduct*.
