2020/21 Price List for the Western Power Network

Publication of determination

The Economic Regulation Authority has approved Western Power's 2020/21 price list. The approved network prices, which will commence on 1 July 2020, are available on the [ERA website](#).

Western Power is required to submit its price list to the ERA for approval under Chapter 8 of the *Electricity Networks Access Code 2004*. The ERA must approve the proposed prices if they are consistent with the price control and pricing methods set out in Western Power's access arrangement.

The ERA has assessed the proposed 2020/21 price list and determined that it complies with the access arrangement.

The average change in tariffs from the 2019/20 price list is 3.8 per cent. Charges for individual customers will vary depending on the type of tariff they are on, and their usage.

The extent to which these increases in network tariffs will affect retail electricity prices for residential customers is determined by the Western Australian Government. On 16 March 2020, the Premier announced that retail electricity prices for households would be frozen until at least 1 July 2021.
