Rail access proposal for Arc Infrastructure network Determination of costs

The ERA has made a determination of incremental and total costs relevant to access proposals put to Arc Infrastructure by Australian Western Railroad Pty Ltd (AWR).

AWR made two access proposals to Arc Infrastructure on 13 January 2021. The access proposals met the requirements of section 8 of the *Railways (Access) Code 2000*, and AWR provided copies of the proposals to the ERA as it was required to do.

Arc Infrastructure responded to AWR, in accordance with section 9(1)(c) of the Code and provided a copy of that response to the ERA. The response included Arc's determination of incremental and total costs for each route section relevant to AWR's proposal.

On 29 January 2021, the ERA published a notice calling for submissions on Arc's determination of costs. The ERA did not receive any submissions.

The ERA has not approved Arc's determination of its costs. The ERA, pursuant to clause 10(3) Schedule 4 to the Code, has made its own determination of incremental and total costs relevant to the AWR proposals.

The ERA's determination of costs has been provided to Arc Infrastructure and AWR. The confidentiality provisions of the Code prevent the provision of the ERA decision document at this stage.
