2021/22 Price List for the Western Power Network

Publication of determination

The Economic Regulation Authority has approved Western Power's 2021/22 price list. The approved network prices, which will commence on 1 July 2021, are available on the [ERA website](#).

Western Power is required to submit its price list to the ERA for approval under Chapter 8 of the *Electricity Networks Access Code 2004*. The ERA must approve the proposed prices if they are consistent with Western Power's approved access arrangement and the Access Code.

The ERA has assessed the proposed 2021/22 price list and determined that it complies with the access arrangement and Access Code requirements.

The average increase in tariffs from the 2020/21 price list is 2.27 per cent. Charges for individual customers will vary depending on the type of tariff they are on, and their usage.

The extent to which these increases in network tariffs will affect retail electricity prices for residential customers is determined by the Western Australian Government.
