

# Notice

30 June 2021

## Approval of 2021/22 ancillary services requirements

The Economic Regulation Authority has approved the Australian Energy Market Operator's ancillary services requirements and plan for 2021/22.

Ancillary services are required to maintain power system security and reliability and ensure that electricity supplies are of acceptable quality.

The Australian Energy Market Operator (AEMO) submits its requirements, including costs of those services for the previous year, to the ERA for audit and approval.

These requirements are set out in AEMO's [2021/22 ancillary services report](#).

The ERA's audit and approval report is available on the [ERA website](#).
