## Non-scheme financial reporting requirements

### Corrigenda to publication of updated financial reporting templates

The ERA has republished an updated financial reporting template under the [non-scheme](#) gas pipeline reporting guidelines that was published on 30 June 2021, following identification of some minor errors.

The financial reporting template has been updated to correct cell reference errors in the 'Summary' and '3. Statement of Pipeline Assets' worksheets. All changes are documented in the Amendment record worksheet of the updated template.

This financial reporting template must be used by operators of gas pipelines in Western Australia that are not subject to full or light regulation and do not have an exemption from providing financial information.
