## Guideline on the demand management innovation allowance mechanism for Western Power

### Publication of submissions

The Economic Regulation Authority has published public submissions received in response to a consultation paper on the guideline for the demand management innovation allowance mechanism for Western Power.

As part of its preparations for the upcoming review of Western Power's access arrangement, the ERA must publish a guideline on the demand management innovation allowance mechanism, including the criteria for projects that will be eligible for the allowance. The guideline must also set out the information that Western Power is required to submit in a compliance report to the ERA for publication.

The ERA appreciates the input from interested parties and will consider the matters raised in the public submissions. The submissions can be found on the [ERA website](#).
