## Classification of services provided by batteries owned by Western Power

### Publication of submissions

The Economic Regulation Authority has published public submissions received in response to a consultation paper on whether services provided by batteries owned by Western Power should be classified as excluded services.

As indicated in its final decision on the framework and approach for Western Power's fifth access arrangement review, the ERA is considering how services provided by batteries owned by Western Power should be classified under the access arrangement.

The ERA appreciates the input from interested parties and will consider the matters raised in the public submissions. The submissions can be found on the [ERA website](#).
