## Proposed metering documents submitted by Peel Renewable Energy

### Consultation

On 23 November 2021, the Economic Regulation Authority received an [application](#) from Peel Renewable Energy for approval of a proposed model service level agreement, a metrology procedure and a registration process for metering installation providers.

Peel Renewable Energy is the licenced distribution network service provider for the Peel Business Park Microgrid, located at Nambeelup.

The documents are required under the *Electricity Industry (Metering) Code 2012*. The model service level agreement details the metering services that a network operator must provide and the terms and conditions, including applicable charges. The metrology procedure provides guidance on the provision, installation and maintenance of metering equipment connected to the network. The registration process specifies the criteria that the network operator will take into account when considering an application for registration and authorising the work that may be undertaken.

### Invitation for submissions

The ERA invites interested parties to make submissions on the proposed documents.

Submissions close 4:00 pm (WST) Friday, 17 December 2021.

Submissions should be lodged online using the form on our website [www.erawa.com.au/consultation](http://www.erawa.com.au/consultation).
