Access Arrangement Information - Document Index

As per the Electricity Networks Access Code 2004 Guidelines for Access Arrangement Information (6 December 2010), the access arrangement submission requires a document index.

...the service provider must provide the Authority with a “document index” that identifies the following information for each document or group of documents.

- *Document title and, if applicable, document reference number/identifier*
- *Date of issue/publication*
- *A summary of the document’s purpose and relevance (that is, the specific reason as to why the document has been provided)*
- *Page references to specific information of relevance within the document.*

The document reference relates to the Chapter in the access arrangement information which first references the attachment.
