1 March 2022

## Western Power's technical rules

### Updated list of exemptions

Western Power has provided the Economic Regulation Authority with an updated list of exemptions to its technical rules. The updated list includes exemptions granted from 1 July 2021 to 31 December 2021.

Western Power's technical rules set out the standard requirements for customer connection. Under certain circumstances, Western Power may exempt a customer from complying with one or more requirements of the rules.

Western Power is required to notify the ERA under section 12.38 of the *Electricity Networks Access Code 2004* when an exemption is made. The ERA then notifies the public. Western Power's list of exemptions is available on the [ERA website](#).
