Collgar Wind Farm Pty Ltd

2021 performance audit and asset management system review

The Economic Regulation Authority has published the 2021 [performance audit](#) and [asset management system review reports](#) for Collgar Wind Farm Pty Ltd's electricity generation licence EGL22.

Collgar Wind Farm is located near the town of Merredin, 256 kilometres east of Perth. The wind farm consists of 111 wind turbines with a total generating capacity of 222 megawatts and is connected to the South West Interconnected System.

The ERA's decision

The ERA considers that Collgar has achieved a high level of compliance with its licence and has an effective asset management system.

The ERA has decided to maintain the audit and review period at 60 months. The next audit and review will cover the period 1 November 2021 to 31 October 2026, with the report due to be provided by 31 January 2027.

Audit and review findings

Audit

The audit of the 42 licence obligations applicable to Collgar found two minor non-compliances.

The auditor made one recommendation.¹ Collgar was not required to submit a post-audit implementation plan because it had already addressed the auditor's recommendation before the auditor submitted the final audit report.

Review

The assessment of the 12 asset management system processes prescribed in the ERA's *2019 Audit and Review Guidelines: Electricity and Gas Licences* found no asset management system deficiencies.

¹ The auditor did not make a recommendation for one of the non-compliances because Collgar had already made adequate changes to its processes to address the non-compliance prior to the audit.
