Subject: Form Submitted From ERA Home [Lodge your submission]

A 'Lodge your submission' form has been submitted from the **ERA Home** website.

The supplied details are specified below:

Consultation: Triennial review of the effectiveness of the Wholesale Electricity Market 2022 - Release of Discussion paper - Invitation for submissions

Are you submitting as an individual or on behalf of an organisation?: Organisation

Organisational name: Sustainable Energy Now

Full Name: Fraser Maywood

Email: [REDACTED]

Telephone: [REDACTED]

Emissions intensity should be addressed in the market rules

5 min settlement rules need revision such that last generator in doesn't set the price - otherwise the cost advantage of renewables won't flow through to consumers

"Without efficient price signals" - we should be also looking to good policy settings not just the market - market doesn't operate very well during a major transition such as now

Comments: "a reliable supply of electricity at the lowest sustainable cost to consumers" - also need to address emissions intensity

Market dominance of synergy as a gentailer needs to be addressed

Network constraints need to be addressed urgently so investment risks for private investors are lowered and the market operates in an open and fair manner
