## Western Power's fifth access arrangement review

### Publication of clean version of approved access arrangement and supporting information

The Economic Regulation Authority has published a [clean version](#) of Western Power's access arrangement for the period 2022/23 to 2026/27.

The ERA published its [final decision](#) on Western Power's proposed access arrangement on 31 March 2023. As the ERA did not approve Western Power's proposal, the ERA also drafted, approved and published its own access arrangement based on the revised proposal submitted by Western Power on 15 November 2022 and amended in accordance with the final decision.

The access arrangement published on 31 March 2023 displayed the amendments as track changes. The clean version has track changes accepted.

The clean version includes a correction to the target revenue values in Table 45 of the access arrangement. The values included in the track change version of the access arrangement published on 31 March 2023 were not consistent with the final decision. A comparison of the values is shown in the table below.

	30 June 2023	30 June 2024	30 June 2025	30 June 2026	30 June 2027
Incorrect values included in the access arrangement published on 31 March 2023	1,428.6	1,475.3	1,512.5	1,562.3	1,610.3
Corrected values to be consistent with the final decision published on 31 March 2023.	1,414.4	1,468.1	1,512.7	1,570.4	1,626.5

All copies of the approved access arrangement obtained from the ERA website prior to this notice should be corrected accordingly. No change is required to the final decision documents or target revenue model. The 2023/24 price list was based on the correct target revenue value.
