

Notice

6 December 2023

Water supply, sewerage and irrigation performance data 2018 to 2023

The Economic Regulation Authority has published the [performance data](#) for water supply, sewerage and irrigation services for the period 2018 to 2023.

Water licences have a condition requiring licensees to provide performance data to the ERA for each year ending 30 June. The [Water, Sewerage and Irrigation Licence Performance Reporting Handbook](#) specifies the data to be provided by licensees for each water service.

The ERA only publishes data for water, sewerage and irrigation supply schemes with less than 10,000 connected properties.

There is a separate national performance reporting framework for water and sewerage supply schemes with more than 10,000 connected properties, which is managed by the Bureau of Meteorology. Information about the reporting framework and previous performance reports are available on the [Bureau of Meteorology's website](#).
