Horizon Power

Approval of amended electricity standard form contract

The Economic Regulation Authority has approved amendments to Regional Power Corporation's (trading as Horizon Power) electricity standard form contract. The amended standard form contract is available on the [ERA's website](#).

Horizon Power amended its standard form contract to apply plain language drafting and align it with the *Code of Conduct for the Supply of Electricity to Small Use Customers 2022*, which took effect on 20 February 2023.

A licensee that retails electricity to small use customers is required to have an ERA approved standard form contract.¹ Horizon Power holds electricity retail licence [EIRL2](#), authorising it to supply electricity transmission, distribution and retail services in areas of Western Australia not supplied by the South West Interconnected System.

Under the *Electricity Industry Act 2004*, the ERA must not approve a standard form contract if it considers that the contract does not meet the requirements of the *Electricity Industry (Customer Contracts) Regulations 2005* or will be inconsistent with the Act or any other written law, or any term, condition or provision of the licence. The ERA is satisfied Horizon Power's amended standard form contract meets these requirements.
