Limit Advice and Constraint Equation Review 2025

Draft report for consultation

The Economic Regulation Authority has published the [draft report](#) for its first review of how effectively the Limit Advice developed by the network operator and the Constraint Equations formulated by the Australian Energy Market Operator (AEMO) meet the State Electricity Objective and good electricity industry practice.

Constraint equations are mathematical representations of network (and other) limits and are used in the dispatch of electricity.

The ERA must complete its first review within two years of the commencement of the new Wholesale Electricity Market design, which commenced on 1 October 2023.

The ERA is seeking feedback on its draft report, and will hold a stakeholder workshop on Thursday, 14 August 2025. If you would like to attend, please email Market.Monitoring@erawa.com.au.

Our final report is due to be published by 30 September 2025.

Invitation for submissions

The ERA invites interested parties to make submissions on its draft report.

Submissions close 4:00pm (WST) Friday, 22 August 2025.

Submissions can be lodged online using the form on our [Current Consultation webpage](#).
