1 SCOPE

The Economic Regulation Authority (Authority), as the regulator responsible for administering the licensing scheme under the *Electricity Industry Act 2004* (Act), is seeking public comments on this draft Electricity Compliance Reporting Manual (Reporting Manual) which has been prepared for electricity licensees.

The reporting manual (manual) provides a list of all compliance requirements for licensees and associates a timeframe for licensees to report on any non compliance matters relating to each licence obligation. All compliance reporting under the manual is exception-based. The manual includes details of the licensees':

- Compliance reporting requirements, including the timing and format of reporting.
- Licence conditions and obligations.

Interested parties are invited to comment on the detail of the proposed Reporting Manual including the:

- Appropriateness of the reporting arrangements.
- Timeframe to report each licence obligation.
- Completeness of the licence conditions and obligations as identified.

Submissions should be in both printed and electronic form and should be received by 4:00pm WST on 1 September 2006, addressed to:

2 INTRODUCTION

The licensing of electricity supply in Western Australia is provided for under the Act. The Act creates five licence classifications:

- Generation
- Transmission
- Distribution
- Retail
- Integrated regional

The Authority is responsible for administering the licensing scheme under the Act, including determining the terms and conditions, and issuing of, licences. The Authority's standard form licences (available at www.era.wa.gov.au) were designed to reduce any unnecessary regulatory burden on licensees in line with the Authority's aim of best practice regulation. The Authority places priority on developing a compliance culture among licensees through a framework that encourages licensees to self-assess compliance with licence conditions and report breaches on a self reporting basis.

A business licensed by the Authority is required to comply with a range of obligations prescribed by the Act and its associated regulations and codes.

The regulations and codes made under the Act were developed by Government in conjunction with electricity industry stakeholders. Each of the relevant regulations and codes were approved by the Minister for Energy and imposed upon licence holders by way of licence conditions.

It is the Authority's responsibility under the Act to monitor and report to the Minister on, the operation of the licensing scheme and to inform the Minister of any failure by a licensee to comply with its licence conditions including compliance with the relevant regulations and codes.

It is important there is a shared understanding amongst all stakeholders in respect of licence terms and conditions applicable to a licensee and the way in which the Authority will fulfil its responsibilities under the Act, including monitoring and reporting on licence compliance. In support of this objective the Authority has issued this manual in order to provide:

- A consolidated list of the terms and conditions of the each type of electricity licence to assist licensees with identifying the compliance obligations relevant to the licence(s) they have been granted.
- Categorisation of licence conditions to assist with reporting obligations.
- A self-assessment framework for licensees to facilitate compliance with licence conditions and report non-compliance to the Authority on a self reporting basis.
- The reports that licensees must provide to the Authority and the timing of these reports.

The manual aims to identify all the compliance requirements for each type of licence in every operational scenario. As a result this manual is very comprehensive. The Authority notes that for most licensees the majority of the compliance requirements set out in this manual will not apply. Further, many of the compliance requirements may only come into play in certain circumstances (for example the dispute resolution obligations). Accordingly,

licensees should not be concerned with the large number of compliance requirements identified in this manual. Rather licensees are encouraged to make note of the compliance requirements that apply to them based on their licence type and circumstances.

While the Authority has taken all care to compile the compliance requirements for each type of licence under the Act, the omission of a compliance requirement in this manual does not infer a licensee is exempt from fulfilling that requirement. Notwithstanding the information presented in this manual, licensees are required to ensure they are aware of the statutory obligations relevant to their licence and take measures to comply with these obligations.

It is anticipated the Authority will update this manual to incorporate amendments to the Act, Regulations and Codes from time to time. Section 3.8 identifies three projects that might result in amendments to this manual at the time of writing.

This manual is structured as follows:

- Section 3 details the nature of licensees' compliance reporting requirements, including the timing and format of reporting.
- Section 4 details the format of the compliance report template.
- Section 5 details the format for reporting non-compliances with licence conditions.
- Section 6 details the Type 1 reporting obligations for all licence types.
- Sections 7 to 14 detail the licence conditions applicable to each licence under the following legislative and regulatory instruments:
 - 1.1 Electricity Industry Customer Transfer Code 2004 (Section 6);
 - 1.2 Electricity Industry (Obligation to Connect) Regulations 2005 (Section 7);
 - 1.3 Electricity Industry (Licence Conditions) Regulations 2005 (Section 8);
 - 1.4 Electricity Industry Act 2004: Licence Conditions and Obligations (Section 9);
 - 1.5 Distribution Licence, Generation Licence, Integrated Regional Licence, Retail Licence and Transmission Licence Conditions and Obligations (Section 10);
 - 1.6 Code of Conduct (for the Supply of Electricity to Small Use Customers) (Section 11);
 - 1.7 Electricity Industry (Network Quality and Reliability of Supply) Code 2005 (Section 12); and
 - 1.8 Electricity Industry Metering Code 2005 (Section 13).

3 COMPLIANCE REPORTING REQUIREMENTS

3.1 Classification of Conditions

The Authority has classified all licence compliance requirements (obligations) as Type 1, 2 or Not Reportable depending on the assessed impact of a potential licence breach on the regulatory policy objectives.

A licence obligation is categorised as **Type 1** if a breach would have a critical impact on the regulatory policy objective(s). A breach of a type 1 licence obligation must be reported immediately to the Authority.

A licence obligation is categorised as **Type 2** if a breach would have a minor impact on the regulatory policy objective(s). Type 2 breaches are to be reported annually to the Authority using an exception reporting approach.

A licence obligation is categorised as not reportable (NR) if a breach would have a non-material impact on regulatory policy objective(s) and/or there are other mechanisms whereby the Authority will become aware of the breach. Breaches do not need to be reported to the Authority – these obligations nevertheless remain licence obligations with which the licensee must comply.

The licensing framework and legislation also provide mechanisms, such as performance audits, to assess a licensee's compliance with licence conditions (refer section 3.6).

The Authority has set out the categories of licence obligations in this manual that apply to all licensees. However, the Authority may amend the category of licence obligations, or the reporting frequency, for licensees where the Authority is of the view that such amendments are necessary to achieve identified regulatory policy objectives.

3.2 Immediate Notification

A licensee must immediately notify the Authority when it becomes aware of a breach of a Type 1 licence obligation. This notification must include:

- A telephone call to the Executive Director - Licensing, Monitoring & Customer Protection or the Assistant Director Monitoring on (08) 9213 1900 to explain the nature and impact of the breach; and
- A letter from the licensee's senior executive officer to the Authority's Chairman within 5 business days of the breach, which details:
 - 1.9 The licence obligation that has been breached.
 - 1.10 The nature and extent of the breach.
 - 1.11 The impact of the breach including the number of customers and other licensees affected.
 - 1.12 The reasons for the breach.
 - 1.13 The actions that the licensee has taken to rectify the breach.
 - 1.14 The actions taken to prevent recurrence of the breach.

1.15 The date the licensee has, or expects to, comply again fully with the licence obligation that has been breached.

The format of the letter that must be used for reporting breaches of Type 1 obligations is provided in section 5.

3.3 Compliance Reports

The licensee is required to submit compliance reports to the Authority, for type 2 licence obligations that:

- Confirm that it has complied with all relevant licence obligations during the period, other than those specifically referred to in the report.
- Identify any licence obligations that have been breached during the period and provide details of:

1.16 The licence obligation that has been breached.

1.17 The nature and extent of the breach.

1.18 The impact of the breach including the number of customers and other licensees affected.

1.19 The reasons for the breach.

1.20 The actions that the licensee has taken to rectify the breach.

1.21 The date the licensee has, or expects to, comply again fully with the licence obligation that has been breached.

The format of the compliance report, which must be approved by the licensee's senior executive officer, is provided in section 4.

3.4 Reporting Cycle

Every licensee is required to submit a compliance report to the Authority covering all of its type 1 and type 2 licence obligations for each financial year (1 July to 30 June inclusive) by 31 August immediately following the financial year the subject of the report.

3.5 Lodging Immediate Notifications and Compliance Reports

A licensee must lodge any Type 1 immediate notification and its compliance reports both electronically and in writing to the following addresses:

Electronic lodgement:

<mailto:electricity.licensing@era.wa.gov.au>

Hard copy lodgement:

Chairman
Economic Regulation Authority
PO Box 8469
Perth Business Centre
Western Australia 6849

As noted above, any Type 1 immediate notification must also include a telephone call to the Executive Director, Licensing, Monitoring & Customer Protection Division on (08) 9213 1900.

3.6 Audits and Reviews

A performance audit of the effectiveness of the measures taken by the licensee to meet the performance criteria specified in the licence and a review of the effectiveness of the licensee's asset management system will be carried out in accordance with the requirements of the licence. Audits and reviews will include an assessment of the licensee's compliance with its obligations to provide reports to the Authority in accordance with the type of licence.

3.7 Amending this Reporting Manual

The Authority may amend this manual from time to time to:

- Reflect amendments of the Act, Regulations or Codes.
- Include references to new licence obligations.
- Delete references to licence obligations that are no longer relevant or that have been replaced with a new obligation.
- Amend the operating statistics that must be provided to the Authority.
- Improve the compliance and reporting process.

The Authority will undertake consultation with licensees, and other stakeholders as appropriate, prior to making any significant revisions to this manual.

3.8 Planned Amendments to this Reporting Manual

Review of the Code of Conduct (For the Supply of Electricity to Small Use Customers) 2005

Section 81 of the Act makes provision for the Authority to establish the Electricity Code of Conduct Consultative Committee (ECCC). Among other things the ECCC will provide advice to the Authority on matters relating to the *Code of Conduct (For the Supply of Electricity to Small Use Customers) 2005* (Code).

In accordance with section 81 of the Act the ECCC will undertake a review of the Code as soon as practicable with the passing of the first anniversary of its commencement and at the expiry of 2 year intervals after the first anniversary.

The Authority anticipates that when the ECCC has completed its review of the Code this manual will be amended accordingly.

Electricity Networks Access Code 2004

The Electricity Networks Access Code 2004 ("Access Code") requires a service provider to include service standard benchmarks for reference services in any Access Arrangement it may have.

Section 11.1 of the Access Code provides that a "service provider must provide reference services at a service standard at least equivalent to the service standard benchmarks set out in the access arrangement".

This requirement is supported by a compliance and reporting framework under section 11.2 of the Access Code that imposes an obligation on the Authority to "monitor and, at least once each year, publish a service provider's actual service standard performance against the service standard benchmarks".

The Access Code gives the Authority the following powers to assist it to fulfill its monitoring responsibility:

- Section 11.3 – request a service standard performance report.
- Section 11.4 – specify, in the service standard performance report, the period of time to be covered, the criteria to be addressed, and the format of the report.
- Section 11.5 – consult and request submissions from network users.

Western Power submitted a proposed Access Arrangement for its South West Interconnected System (SWIS), together with an Access Arrangement Information and draft Technical Rules, to the Authority on 24 August 2005. These documents included proposed service standard benchmarks for Western Power's network activities.

On 21 March 2006, the Authority published its Draft Decision on Western Power's proposed Access Arrangement for the regulated electricity networks in the SWIS. The Draft Decision of the Authority did not approve Western Power's proposed Access Arrangement. In the draft decision, the Authority proposed a number of amendments to the Access Arrangement which included amendments to the proposed service standard benchmarks.

Western Power has subsequently submitted a revised proposed access arrangement in May 2006. The Authority is assessing whether the revised proposed access arrangement has addressed the amendments required by the Draft Decision and is reviewing the issues raised in the public submissions received.

On 21 June 2006, the Authority issued a notice under section 51 of the *Electricity Networks Access Code 2004* (Code) to Western Power to provide additional information that may assist the Authority in relation to the assessment of the Western Power proposed access arrangement and access arrangement information for the South West Interconnected Network. In accordance with the Code, the Authority suspended the operation of the deadline for the issue of a Final Decision. A further notice will be published when the Authority restarts the relevant deadline. The Final Decision is expected to be published early September.

Further information on the assessment of the proposed access arrangement and the public submissions received are available at www.era.wa.gov.au/electricity.

The Authority anticipates that once the service standard benchmarks have been approved, this manual will be amended accordingly.

National Regulatory Reporting for Electricity Distribution and Retailing Businesses

In November 2000, the Utility Regulators Forum, which comprises the Australian Competition and Consumer Commission and Australia's State and Territory-based utility regulators (including the Authority), agreed that there was a need to establish a nationally consistent set of reporting requirements for the Australian electricity industry.

As a consequence, the Utility Regulators Forum established the Steering Committee on National Regulatory Reporting Requirements (SCONRRR), which at the time did not include representation from Western Australia. SCONRRR was tasked to oversee the development of the regulatory reporting requirements for electricity distributors and retailers.

In March 2002, following considerable consultation and analysis by SCONRRR, the Utility Regulators Forum published the *National Regulatory Reporting for Electricity Distribution and Retailing Businesses*. This document sets out a national regulatory reporting framework for three areas of activity:

- Service performance of electricity distributors – the following five categories of indicators were identified:
 - 1.22 Reliability measures;
 - 1.23 Timely provision of services;
 - 1.24 Timely repair of faulty street lights;
 - 1.25 Call centre performance; and
 - 1.26 Customer complaints.
- Financial performance of electricity distributors – a structure was identified for the national alignment of regulatory accounting requirements.
- Service performance of electricity retailers – indicators were identified in two categories:
 - 1.27 Access and affordability; and
 - 1.28 Customer service.

The Utility Regulators Forum's publication is available at:

<http://www.accc.gov.au/content/item.phtml?itemId=332190&nodeId=file422f80656d999&fn=National%20regulatory%20reporting%20for%20electricity%20distribution%20and%20retailinq%20businesses.pdf>.

Following this publication and implementation of the performance indicators in Eastern States jurisdictions however, SCONRRR has identified some issues regarding their effectiveness, including:

- Problems with reporting consistency between and within jurisdictions have been encountered.
- There has been convergence between electricity and gas supply as a number of retailers operating in various jurisdictions offer dual supply contracts to customers who wish to enter the competitive energy market.
- Some jurisdictions have encountered increases in disconnection rates in recent times and further enhancements of affordability indicators may be warranted.

As a result of these observations, SCONRRR published a Discussion Paper in March 2006 which proposes a revised set of retail performance indicators in order to gain agreement to apply further consistency to the data collected by regulators for national reporting purposes.

The Discussion Paper outlines a proposal to:

- Revise or clarify some of the data definitions employed for the electricity retail sector.
- Expand the performance indicators to include the gas retail sector.
- Add additional affordability information for both electricity and gas retail.

The scope of this review of performance indicators has been limited. The proposed changes are considered important in developing a strong reporting base by facilitating greater consistency in performance reporting by jurisdictional regulators, which should assist in the transition to the national energy regulatory framework.

While the Authority was not represented on the Committee during the development of these documents, it considers that there is potentially significant value in Western Australia's distribution and retail licensees being required to report their service performance in accordance with its standards. This would enable:

- Licensees' performance to be benchmarked against similar businesses in other jurisdictions.
- The Authority, licensees, other industry participants and, importantly, electricity customers to understand better the level of service that Western Australian customers are receiving, relative to equivalent customers in other jurisdictions.

The Authority's preliminary view is that at this stage the Utility Regulators Forum's national reporting framework should only be adopted once agreement is reached between the various jurisdictions.

4 COMPLIANCE REPORT TEMPLATE

Licensees must use the following format for their compliance reports. The format of “Schedule A” referred to below is detailed in section 5 of this manual.

Compliance Report

Period: [Date] 200_ to [Date] 200_

Submitted by: [Licensee]

ACN: [Number]

5 FORMAT FOR REPORTING NON-COMPLIANCES

Licensees must use the following format for reporting to the Authority:

- A non-compliance with a Type 1 licence obligation.
- A non-compliance of a licence obligation in “Schedule A” of an annual compliance report referred to in section 4 of this manual.

Licence obligation # from table in section 7 of this manual	Brief description of licence obligation that has been breached	Describe: <ol style="list-style-type: none"> 1. Distribution Licence condition 5.1 Integrated Regional Licence condition 5.1 Transmission Licence condition 5.1	Electricity Industry Metering Code clause 5.21(11)	A network operator must advise the affected parties as soon as practicable of errors detected under a test or audit, the possible duration of the errors, and must restore the accuracy of the metering installation in accordance with the applicable service level agreement.	Distribution, Integrated Regional, Transmission	2
442.	Distribution Licence condition 5.1 Integrated Regional Licence condition 5.1 Transmission Licence condition 5.1	Electricity Industry Metering Code clause 5.21(12)	The original stored error correction data in a meter must not be altered except during accuracy testing and calibration of a metering installation.	Distribution, Integrated Regional, Transmission	2
443.	Distribution Licence condition 5.1 Integrated Regional Licence condition 5.1 Transmission Licence condition 5.1	Electricity Industry Metering Code clause 5.22(1)	A network operator must validate energy data in accordance with this Code applying, as a minimum, the prescribed rules and procedures and must, where necessary substitute and estimate energy data under this Code applying, as a minimum, the prescribed rules and procedures.	Distribution, Integrated Regional, Transmission	2
444.	Distribution Licence condition 5.1 Integrated Regional Licence condition 5.1 Transmission Licence condition 5.1	Electricity Industry Metering Code clause 5.22(2)	The network operator must use check metering data, where available, to validate energy data, provided that the check metering data has been appropriately adjusted for differences in metering installation accuracy.	Distribution, Integrated Regional, Transmission	2
445.	Distribution Licence condition 5.1 Integrated Regional Licence condition 5.1 Transmission Licence condition 5.1	Electricity Industry Metering Code clause 5.22(3)	A network operator must prepare substitute values using the prescribed method, if a check meter is not available or energy data cannot be recovered from the metering installation within the time required.	Distribution, Integrated Regional, Transmission	2

446.	Distribution Licence condition 5.1 Integrated Regional Licence condition 5.1 Transmission Licence condition 5.1	Electricity Industry Metering Code clause 5.22(4)	A network operator that detects a loss of energy data or incorrect energy data from a metering installation, must notify each affected Code participant of the loss or error within 24 hours after detection.	Distribution, Integrated Regional, Transmission	2
447.	Distribution Licence condition 5.1 Integrated Regional Licence condition 5.1 Transmission Licence condition 5.1	Electricity Industry Metering Code clause 5.22(5)	Substitution or estimation of energy data is to be required when energy data is missing, unavailable or corrupted, including in the circumstances described.	Distribution, Integrated Regional, Transmission	2
448.	Distribution Licence condition 5.1 Integrated Regional Licence condition 5.1 Transmission Licence condition 5.1	Electricity Industry Metering Code clause 5.22(6)	A network operator must review all validation failures before undertaking any substitution.	Distribution, Integrated Regional, Transmission	2
449.	Distribution Licence condition 5.1 Integrated Regional Licence condition 5.1 Transmission Licence condition 5.1	Electricity Industry Metering Code clause 5.23(1)	A network operator that determines that there is no possibility of determining an actual value for a metering point, must designate an estimated or substituted value for the metering point to be a deemed actual value for the metering point.	Distribution, Integrated Regional, Transmission	2
450.	Distribution Licence condition 5.1 Integrated Regional Licence condition 5.1 Transmission Licence condition 5.1	Electricity Industry Metering Code clause 5.23(3)	A network operator that has designated a deemed actual value for a metering point must repair or replace the meter, or one or more of components of metering equipment (as appropriate) at the metering point.	Distribution, Integrated Regional, Transmission	2
451.	Distribution Licence condition 5.1 Integrated Regional Licence condition 5.1 Transmission Licence condition 5.1	Electricity Industry Metering Code clause 5.24(1)	A network operator that uses an actual value (first value) for energy data for a metering point, and a better quality actual or deemed actual value, is available (second value), must replace the first value with the second value if doing so would be consistent with good electricity industry practice.	Distribution, Integrated Regional, Transmission	2

452.	Distribution Licence condition 5.1 Integrated Regional Licence condition 5.1 Transmission Licence condition 5.1	Electricity Industry Metering Code clause 5.24(2)	A network operator that uses a deemed actual value (first value) for energy data for a metering point, and a better quality deemed actual value is available (second value), must replace the first value with the second value if doing so would be consistent with good electricity industry practice.	Distribution, Integrated Regional, Transmission	2
453.	Distribution Licence condition 5.1 Integrated Regional Licence condition 5.1 Transmission Licence condition 5.1	Electricity Industry Metering Code clause 5.24(3)	A network operator that uses an estimated or substituted value (first value) for energy data for a metering point, and a better quality actual, deemed, estimated or substituted value is available (second value), must replace the first value with the second value if doing so would be consistent with good electricity industry practice or the user and its customer jointly request it to do so.	Distribution, Integrated Regional, Transmission	2
454.	Distribution Licence condition 5.1 Integrated Regional Licence condition 5.1 Transmission Licence condition 5.1	Electricity Industry Metering Code clause 5.24(4)	A network operator (acting in accordance with good electricity industry practice) must consider any reasonable request from a Code participant for an estimated or substituted value to be replaced.	Distribution, Integrated Regional, Transmission	2
455.	Distribution Licence condition 5.1 Integrated Regional Licence condition 5.1 Transmission Licence condition 5.1	Electricity Industry Metering Code clause 5.25	A network operator must ensure the accuracy of estimated energy data in accordance with the methods in its metrology procedure; and ensure that any transformation or processing of data preserves its accuracy in accordance with the metrology procedure.	Distribution, Integrated Regional, Transmission	2
456.	Generation Licence condition 5.1 Retail Licence condition 5.1	Electricity Industry Metering Code clause 5.27	A current user must provide the network operator with customer attribute information that it reasonably believes are missing or incorrect, within the timeframes prescribed, upon request.
