Dear Sir,

I am writing this letter to you on behalf of the Grass Patch Community Development Association.

We are interested in obtaining water from the Esperance to Kalgoorlie water pipeline for the residents in our townsite, local Caravan Park, Pioneer Memorial garden, town and school sporting ovals and for beautifying the townsite.

The town water supply in Grass Patch is very limited as it comes from one dam, which does not hold enough water to last the townsite residents throughout summer if all the above mentioned areas are maintained and kept alive throughout the whole year, which then leaves the townsite looking very ugly and unattractive to not only the locals but visitors.

With such a shortage of water we are unable to maintain our town and school sports ovals, which not only impacts on community groups in not being able to hold any sporting activities and therefore going outside the community for sports, it also impacts on our local school (which also obtain water from the same dam), as they are unable to hold multi-schools athletic carnivals and other sporting events.

We would be very appreciative if you could take our communities' needs into consideration to enable us to obtain water from the Esperance to Kalgoorlie pipeline when it is constructed.

Yours Sincerely

Michael Ietto
