

Dear Dr Michael

It is with some concern that I have read and heard of plans to reduce Epic Energy, \rightarrow tariffs, on their Dampier to Bunbury gas transmission pipeline system.

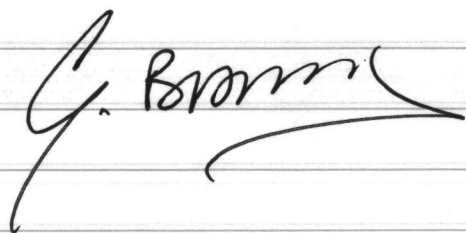

Any reduction in tariffs will impact on Epic's operations maintenance and future construction project work.

Reduced tariffs will compel Epic to cut budgets and running costs across the board, resulting in cancellation or long term deferralment of projects as unviable.

Please consider the people affected by the proposed draft if it was to be implemented.

I am a concerned small contractor.

Yours Sincerely Gary Brown
