

NOTICE

Water, Wastewater and Irrigation Performance Report 2005

The Economic Regulation Authority (Authority) has approved the publication of the Water, Wastewater and Irrigation Performance Report 2005.

The report comprises three parts:

- Part A provides drinking water performance data to 32 major Western Australian towns over the 2001/02, 2002/03, 2003/04 and 2004/05 periods.
- Part B provides wastewater performance data for 21 major Western Australian towns over the periods 2002/03, 2003/04 and 2004/05. Small supplier wastewater information is provided for 24 small suppliers over the periods 2003/04 and 2004/05.
- Part C provides data for 4 irrigation suppliers for the periods 2003/04 and 2004/05.

The data supplied includes information on the physical profile of water and wastewater services, including the population serviced and infrastructure, as well as data on the 'typical' regional Western Australian town in comparison to Perth.

The objectives of this report are to:

- Summarise the data provided by the service providers.
- Highlight comparative performance outcomes for the different towns and localities serviced by the providers.
- Examine service performance variations over the reporting period.
- Benchmark, where possible, Western Australian drinking water and wastewater service delivery.

The report is available on the Authority's website by clicking [here](#).
